## Curriculum for Fourth Year of Computer Engineering (2019 Course) (With effect from 2022-23)

www.unipune.ac.in

### Final Year of Computer Engineering (2019 Course) (With effect from 2022-23)

## Prologue

It is with great pleasure and honor that I share the syllabi for Fourth Year of Computer Engineering (2019 Course) on behalf of Board of Studies, Computer Engineering. We, members of BoS are giving our best to streamline the processes and curricula design.

While revising syllabus, honest and sincere efforts are put to tune Computer Engineering program syllabus in tandem with the objectives of Higher Education of India, AICTE, UGC and affiliated University (SPPU) by keeping an eye on the technological advancements and industrial requirements globally.

Syllabus revision is materialized with sincere efforts, active participation, expert opinions and suggestions from domain professionals. Sincere efforts have been put by members of BoS, teachers, alumni, industry experts in framing the draft with guidelines and recommendations.

Case Studies are included in almost all courses. Course Instructor is recommended to discuss appropriate related recent technology/upgrade/Case Studies to encourage students to study from course to the scenario and think through the largest issues/ recent trends/ utility/ developing real world/ professional skills.

I am sincerely indebted to all the minds and hands who work adroitly to materialize these tasks. I really appreciate your contribution and suggestions in finalizing the contents.

Thanks,

#### Dr. Varsha H. Patil Chairman, Board of Studies (Computer Engineering), SPPU, Pune

		Savitribai Phule Pune University
		Bachelor of Computer Engineering
		Program Outcomes (POs)
Learn	ers are expected to l	know and be able to-
PO1	Engineering knowledge	Apply the knowledge of mathematics, science, Engineering fundamentals, and an Engineering specialization to the solution of complex Engineering problems.
PO2	Problem analysis	Identify, formulate, review research literature, and analyze complex Engineering problems reaching substantiated conclusions using first principles of mathematics natural sciences, and Engineering sciences.
PO3	Design / Development of Solutions	Design solutions for complex Engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and Environmental considerations.
PO4	Conduct Investigations of Complex Problems	Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern Tool Usage	Create, select, and apply appropriate techniques, resources, and modern Engineering and IT tools including prediction and modeling to complex Engineering activities with an understanding of the limitations.
PO6	The Engineer and Society	Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
<b>PO7</b>	Environment and Sustainability	Understand the impact of the professional Engineering solutions in societal and Environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	Ethics	Apply ethical principles and commit to professional ethics and responsibilities and norms of the Engineering practice.
PO9	Individual and Team Work	Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication Skills	Communicate effectively on complex Engineering activities with the Engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO11	Project Management and Finance	Demonstrate knowledge and understanding of the Engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary Environments.
PO12	Life-long Learning	Recognize the need for, and have the preparation and ability to engage in independent and life- long learning in the broadest context of technological change.

#### **Program Specific Outcomes (PSO)**

- PSO1 Professional Skills-The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics, and networking for efficient design of computer-based systems of varying complexities.
   PSO2 Problem-Solving Skills- The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.
   PSO2 Successful Comparison and Enterprogramming. The ability to apply standard practice and strategies in software project development using open-ended programming environments to deliver a quality product for business success.
- **PSO3** Successful Career and Entrepreneurship- The ability to employ modern computer languages, environments, and platforms in creating innovative career paths to be an entrepreneur, and a zest for higher studies.

### **General Guidelines**

1. Every undergraduate program has its own objectives and educational outcomes. These objectives and outcomes are furnished by considering various aspects and impacts of the curriculum. These **Program Outcomes (POs)** are categorically mentioned at the beginning of the curriculum (ref: NBA Manual). There should always be a rationale and a goal behind the inclusion of a course in the curriculum. Course Outcomes though highly rely on the contents of the course, many a times are generic and bundled. The **Course Objectives, Course Outcomes** and **CO-PO mappings matrix** justifies the motives, accomplishment and prospect behind learning the course. The Course Objectives, Course Outcomes and CO-PO Mapping Matrix are provided for reference and these are indicative only. The course instructor may modify them as per his or her perspective.

2. **@CO and PO Mapping Matrix**(Course Objectives and Program Outcomes) attainment mapping matrix at end of course contents, indicates the correlation levels of 3, 2, 1 and '-'. The notation of 3, 2 and 1 denotes substantially (high), moderately (medium) and slightly (low). The mark '-' indicates that there is correlation between CO and PO.

3. For each course, contents are divided into six units-I, II, III, IV, V and VI.

**#Elaborated examples/Case Studies** are included at each unit to explore how the learned topics apply to real world situations and need to be explored so as to assist students to increase their competencies, inculcating the specific skills, building the knowledge to be applicable in any given situation along with an articulation. One or two sample exemplars or case studies are included for each unit; instructor may extend the same with more. **Exemplar/Case Studies** may be assigned as self-study by students and to be excluded from theory examinations.

4. \*For each unit contents, the content attainment mapping is indicated with Course Outcome(s). Instructor may revise the same as per their viewpoint.

5. For laboratory courses, set of suggested assignments is provided for reference. Laboratory Instructors may design suitable set of assignments for respective course at their level. Beyond curriculum assignments and mini-project may be included as the part of laboratory work. Inclusion of it will be the value addition for the students and it will satisfy the intellectuals within the group of the learners and will add to the perspective of the learners.

6. For each laboratory assignment, it is essential for students to draw/write/generate flowchart, algorithm, test cases, mathematical model, Test data set and comparative/complexity analysis (as applicable). Batch size for practical and tutorial may be as per guidelines of authority.

7. For each course, irrespective of the examination head, the instructor should motivate students to read articles/research papers related to recent development and invention in the field.

8. For laboratory, instructions have been included about the conduction and assessment of laboratory work. <u>These</u> guidelines are to be strictly followed.

9. **Term Work** –Term work is continuous assessment that evaluates a student's progress throughout the semester. Term work assessment criteria specify the standards that must be met and the evidence that will be gathered to demonstrate the achievement of course outcomes. Categorical assessment criteria for the term work should establish unambiguous standards of achievement for each course outcome. They should describe what the learner is expected to perform in the laboratories or on the fields to show that the course outcomes have been achieved.

Students' work will be evaluated typically based on the criteria like attentiveness, proficiency in execution of the task, regularity, punctuality, use of referencing, accuracy of language, use of supporting evidence in drawing conclusions, quality of critical thinking and similar performance measuring criteria.

10. Program codes with sample output of all performed assignments are to be submitted as softcopy. Use of DVD or similar media containing students programs maintained by Laboratory In-charge is highly encouraged. For reference one or two journals may be maintained with program prints at Laboratory. As a conscious effort and little contribution towards Green IT and environment awareness, attaching printed papers as part of write-ups and program listing to journal may be avoided. <u>Submission of journal/ term work in the form of softcopy is desirable and appreciated.(In laboratory Practices the lab teachers can give different applications other than the indicated.)</u>

Unit I Ir	ntroduction To Machine Lear	ning 07 Hours
programming, ML vs AI vs D Types of learning: Superv techniques, Models of Machin Grouping and grading models	ised, Unsupervised, and semi- ne learning: Geometric model, Pr s, Parametric and non-parametric r	supervised, reinforcement learning robabilistic Models, Logical Models,
#Exemplar/Case Studies	Suppose you are working for Ul given.Understand the requirement	ber where a task to increase sales is nts of the client
* <u>Mapping of Course</u> <u>Outcomes for Unit</u>	CO1	

Concept of Feature, Preprocessing of data: Normalization and Scaling, Standardization, Managing missing values, Introduction to Dimensionality Reduction, Principal Component Analysis (PCA), Feature Extraction: Kernel PCA, Local Binary Pattern.

Introduction to various Feature Selection Techniques, Sequential Forward Selection, Sequential Backward Selection.

Statistical feature engineering: count-based, Length, Mean, Median, Mode etc. based feature vectorcreation.

Multidimensional Scaling, Matrix Factorization Techniques.

, ,	
#Exemplar/CaseStudies	You are a Data Scientist, and a client comes to you with their data. Client is running a few campaigns from the past few months, but no campaign seemseffective. Client provides you the data of customers, product sales and past campaign success. They want to increase their sales and figure out which marketing strategy isworking the best for them? Questions for data scientists: 1. What data analysis approach will you follow? 2. What statistical approach do you need to follow?
	How will you select important features?

\*Mapping of Course CO2

#### **Outcomes for Unit II**

Unit III Supervised Learning : Regression	06 Hours
---	----------

Bias, Variance, Generalization, Underfitting, Overfitting, Linear regression, Regression: Lasso regression, Ridge regression, Gradient descent algorithm. Evaluation Metrics: MAE, RMSE, R2

#Exemplar/Case Studies	Stock market price prediction	
*Mapping of Course Outcomes for Unit III	CO3	
Unit IV St	upervised Learning : Classification	08 Hours

Classification: K-nearest neighbour, Support vector machine.

Ensemble Learning: Bagging, Boosting, Random Forest,

Adaboost.

Binary-vs-Multiclass Classification, Balanced and Imbalanced Multiclass Classification Problems, Variants of Multiclass Classification: One-vs-One and One-vs-All

Evaluation Metrics and Score: Accuracy, Precision, Recall, Fscore, Cross-validation, Micro-Average Precision and Recall, Micro-Average F-score, Macro-Average Precision and Recall, Macro-Average F-score.

<b>#Exemplar/Case</b> Studies	Prediction of Thyroid disorders such as Hyperthyroid,
	Hypothyroid, Euthyroid-sick, and Euthyroid using multiclass
	classifier.
*Mapping of Course	CO4
<b>Outcomes for Unit IV</b>	

Unit V

#### **Unsupervised Learning**

**07 Hours** 

K-Means, K-medoids, Hierarchical, and Density-based Clustering, Spectral Clustering. Outlier analysis: introduction of isolation factor, local outlier factor.

Evaluation metrics and score: elbow method, extrinsic and intrinsic methods

Fourth Yea	ar of Computer Engineer	ring (2019 Course)	
	410243: Blockchain Tech	nology	
Teaching Scheme:	Credit	Examina	ation Scheme:
TH: 03 Hours/Week	03	In-Sem (Pap	er): 30 Marks
	05	End-Sem (Pape	er): 70 Marks
Prerequisite Courses: Compu	• •	0244)	
Companion Course: Laborate	bry Practice III(410246)		
Course Objectives:			
Technology behind	Blockchain		
•••	itcoin and Smart contracts		
51 57	s algorithms used in Blockchai	n	
Real-world application			
To analyze Blockch	ain Ethereum Platform using S	Solidity	
To Describe Block	hain Case Studies		
<b>Course Outcomes:</b>			
On completion of the course, s	student will be able to-		
CO1: Interpret the fur	damentals and basic concepts	in Blockchain	
-	orking of different blockchain		
	let for cryptocurrency based tr	-	
CO4: Analyze the imp	portance of blockchain in findi	ng the solution to the rea	ll-world
problems.			
CO5: Illustrate the Ether	hereum public block chain pla	tform	
	application where block chain	n technology can be effe	ctively used
and implemented.			
	<b>Course Contents</b>		
Unit I Mat	hematical Foundation for Bl	ockchain	06 Hours
Cryptography: Symmetric Ke Cryptography (ECC), Crypto (DSA), Merkel Trees.			
	Compare the Summetrie and	Agymmotic Countra and	hy algorithms
<u>#Exemplar/Case Studies</u>	Compare the Symmetric and	Asymmetric Cryptograp	ny argorithms
*Mapping of Course	CO1		
<b>Outcomes for Unit I</b>			
Unit II	Feature Engineering		07 Hours
History, Centralized Vs. De Execution Layer, Semantic I important? Limitations of Cen	Layer, Propagation Layer, Co	onsensus Layer, Why i	
#Exemplar/CaseStudies	Study of a research paper bas	ed on Blockchain.	

Faculty of Engineering	Savitribai Phule Pune University
*Mapping of Course	CO1
Outcomes for Unit II	
Unit III Blockchain	Platforms and Consensus in Blockchain06 Hours
Hyperledger, IoTA, Corda, R. Consensus in Blockchair Algorithms, Proof of Work, Time, Proof of Activity, Proof of Burn. #Exemplar/Case Studies *Mapping of Course Outcomes for Unit III	<ul> <li>Consensus Approach, Consensus Elements, Consensus Byzantine General problem, Proof of Stake, Proof of Elapsed</li> <li>Compare different consensus algorithms used in Blockchain Technology.</li> <li>CO2</li> </ul>
Unit IV C	ryptocurrency – Bitcoin, and Token 06 Hours
	and the Cryptocurrency, Cryptocurrency Basics ptocurrency Usage, Cryptowallets: Metamask, Coinbase, Binance
<u>#Exemplar/Case</u> Studies	Create your own wallet for crypto currency using any of the Blockchain Platforms.
*Mapping of Course Outcomes for Unit IV	CO3
Unit V Block	chain Ethereum Platform using Solidity06 Hours
to smart contracts, Purpose	Ethereum Networks, EVM (Ethereum Virtual Machine), Introduction and types of Smart Contracts, Implementing and deploying smart varm (Decentralized Storage Platform), aging Platform) Study Truffle Development Environment.
*Mapping of Course Outcomes for Unit V	CO4
Unit VI	Blockchain Case Studies 06 Hours
	olications, Retail, Banking and Financial Services, Government rgy and Utilities, Blockchain Integration with other Domains
#Exemplar/Case Studies	Study 2 uses cases of Blockchain and write a detailed report on every aspect implemented in the same
*Mapping of Course Outcomes for Unit VI	CO5, CO6

#### Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) **Elective III** 410244(B): Multimedia Techniques **Examination Scheme: In-Teaching Scheme:** Credit Sem (Paper): 30 Marks 03 **TH: 03 Hours/Week** End-Sem (Paper): 70 Marks **Prerequisite Courses:** Computer Graphics (210241) **Companion Course**: Laboratory Practice IV(410247) **Course Objectives:** • To understand input and output devices, device drivers, control signals and protocols, DSPs To study and use standards (e.g., audio, graphics, video) • To implement applications, media editors, authoring systems, and authoring by studying streams/structures, capture/represent/transform, spaces/domains, compression/coding To design and develop content-based analysis, indexing, and retrieval of audio, • images, animation, andvideo To demonstrate presentation, rendering, synchronization, multi-modal integration/interfaces • To Understand IoT architecture's and Multimedia Internet of things **Course Outcomes:** On completion of the course, student will be able to-CO1: Describe the media and supporting devices commonly associated with multimedia information and systems. CO2: Demonstrate the use of content-based information analysis in a multimedia information system. CO3: Critique multimedia presentations in terms of their appropriate use of audio, video, graphics, color, and other information presentation concepts. CO4: Implement a multimedia application using an authoring system. CO5: Understanding of technologies for tracking, navigation and gestural control. CO6: Implement Multimedia Internet of Things Architectures. **Course Contents** Unit I **07 Hours Introduction to multimedia** What is Multimedia and their Components, History of Multimedia; Hypermedia, WWW, and Internet; Multimedia Tools: Static (text, graphics, and still images), Active (sound, animation, and video, etc.); Multimedia Sharing and Distribution; Multimedia Authoring Tools: Adobe Premiere, Adobe Director, Adobe Flash. To study and install open-source multimedia Tools #Exemplar/Case Studies CO1 \*Mapping of Course **Outcomes for Unit I Unit II 07 Hours Graphics and Data Representation Techniques**

What are Graphics data types, 1-bit Images, 8 –bit grey level ,16-bit grey level images, Image data type,Image data type:8 bit & amp; 24-bit color images, Higher bit depth images, Color Lookup tables. File Formats: GIF, JPEG, PNG, TIFF, PSD, APS, AI, INDD, RAW, Windows BMP, Windows WMF,

Netpbm format, EXIF, PTM, Text file format: RTF, TGA Applications/Use of text in Multimedia

#Exemplar/CaseStudies	To study conversion of image file formats from or	ne to Other.
*Mapping of Cours	CO2	
Outcomes for Unit II		
Unit III N	Iultimedia Representations Techniques	07 Hours

Principal concepts for the analog video: CRT, NTSC Video (National Television System Committee), PAL Video (Phase Alternating Line), SECAM Video (System Electronic Couleur Avec Memoire), Digital Video: Chroma Subsampling, High-Definition TV, Ultra High Definition TV (UHDTV), Component Video: High-Definition Multimedia Interface (HDMI),3D Video and TV: various cues, Basics of Digital Audio: What is Sound?, Nyquist Theorem, SNR, SQNR, Audio Filtering, Synthetic Sounds, MIDI Overview: Hardware, Structure, Conversion to WAV, Coding of Audio: PCM, DPCM, DM (Delta Modulation)

<u>#Exemplar/Case</u> Studies	Install and use Handbrake (link is htt	tps://handbrake.fr) software to					
	understand the concept of interlaced, deinterlace, noise filters, bitrate, and						
	frame rate for any sample 30 min video, and note down the observations						
	from the output video.						
*Mapping of Course	CO3						
<b>Outcomes for Unit III</b>							
Unit IV	Compression Algorithms	07 Hours					

Introduction to multimedia – Graphics, Image and Video representations – Fundamental concepts of video, digital audio – Storage requirements of multimedia applications – Need for compression – Types of compression algorithms- lossless compression algorithms RLC, VLC, DBC, AC, lossless image compression, differential coding of Images, lossy compression algorithms-Rate distortion theory, Quantization ,Transform coding, wavelet based coding, embedded Zerotress of wavelet coefficients . Image compression standard -JPEG standard, JPEG 2000 standard, LS standard, Bilevel image compression standard. Introduction to video compression - video compression based on motion compensation, Search for motion vectors, MPEG Video coding I , MPEG 1,2,4,7 onwards. Basic Audio Compression Techniques -ADPCM in speech coding, Vocoders, MPEG audio compression

**<u>#Exemplar/Case</u>** Studies Implementation of compression algorithms

*Mapping of Course	CO3, CO4	
<b>Outcomes for Unit IV</b>		
Unit V Augmented Realit	y(AR), Virtual Reality (VR) and Mixed Reality (MR)	07 Hours

Basics of Virtual Reality, difference between Virtual Reality and Augmented Reality, Requirement of Augmented Reality, Components and Performance issues in AR, Design and Technological foundations for Immersive Experiences. Input devices – controllers, motion trackers and motion capture technologies for tracking, navigation and gestural control. Output devices – Head Mounted VR Displays, Augmented and Mixed reality glasses. 3D interactive and procedural graphics. Immersive surround sound. Haptic and vibrotactile devices. Best practices in VR, AR and MR Future applications of Immersive Technologies. VRML Programming Modeling objects and virtual environments Domain Dependent applications:

Faculty of Engineering		Savitribai Phule Pune University
Medical, Visualization, Ente	ertainment, etc.	
#Exemplar/Case Studies	Navigation Assistance System	
*Mapping of Course Outcomes for Unit V	CO5	
Unit VI	Multimedia Internet of Things	07 Hours

IoT and Multimedia IoT Architecture: IoT Architecture; M-IoT Architectures: Multi-Agent Based, AI-Based Software-Defined, Big Data Layered; Applications of M-IoT: Road Management System, Multimedia IoT in Industrial Applications, Health Monitoring

<u>#Exemplar/Case</u> Studies	Traffic Monitoring System
<u>*Mapping of Course</u> Outcomes for Unit VI	CO6

## Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) Elective III

### 410244(D): Object oriented Modeling and Design

Teaching Scheme:	Credit	In-Sem (Paper): 30 Marks
TH: 03 Hours/Week	03	End-Sem (Paper): 70 Marks
Prerequisite Courses: Softw	are Engineering (210245)	
Companion Course: Labora	tory Practice IV (410247)	

#### **Course Objectives:**

- Describe the concepts involved in Object-Oriented modelling and their benefits.
- Demonstrate concept of use-case model, sequence model and state chart model for a given problem.
- Explain the facets of the unified process approach to design and build a Software system.
- Translate the requirements into implementation for Object Oriented design.
- Choose an appropriate design pattern to facilitate development procedure. Select suitable design pattern depending on nature of application.
- To describe Designing and Management of Patterns.

#### **Course Outcomes:**

On completion of the course, student will be able to-

CO1: Describe the concepts of object-oriented and basic class modelling.

CO2: Draw class diagrams, sequence diagrams and interaction diagrams to solve problems.

CO3: Choose and apply a befitting design pattern for the given problem

CO4: To Analyze applications, architectural Styles & software control strategies

CO5: To develop Class design Models & choose Legacy Systems.

CO6:To Understand Design Patterns

### **Course Contents**

#### Unit I Introduction To Modeling

#### **06 Hours**

What is Object Orientation? What is OO development? OO themes; Evidence for usefulness of OO development; OO modeling history Modeling as Design Technique: Modeling; abstraction; The three models. Class Modeling: Object and class concepts; Link and associations concepts; Generalization and inheritance; A sample class model; Navigation of class models; Practical tips.

#Exemplar/Case Studies Case Study of ATM System					
*Mapping of Course Outcomes for Unit I	CO1				
Unit II Advance	ed Class Modeling and State Modeling	06 Hours			

Advanced object and class concepts; Association ends; N-ary associations; Aggregation; Abstract classes; Multiple inheritance; Metadata; Reification; Constraints; Derived data; Packages; Practical tips. State Modeling: Events, States, Transitions and Conditions; State diagrams; State diagram

Faculty of Engineering	Savi	tribai Phule Pune University
behavior; Practical tips.		
<u>#Exemplar/CaseStudies</u>	Case Study of Train Reservation System	
*Mapping of Course	CO2	
Outcomes for Unit II		
Unit III Advanced	State Modeling and Interaction Modeling	06 Hours

Advanced State Modeling: Nested state diagrams; Nested states; Signal generalization; Concurrency; A sample state model; Relation of class and state models; Practical tips.Interaction Modeling: Use case models; Sequence models; Activity models. Use case relationships; Procedural sequence models; Special constructs for activity models.

<u>#Exempla</u>	r/Case Studies	Case Study of Coffee Vending Machine	
*Mapping Outcomes	<u>of Course</u> for Unit III	CO2, C03	
Unit IV	User Applicat	tion Analysis : System Design	06 Hours

Application Analysis: Application interaction model; Application class model; Application state model; Adding operations. Overview of system design; Estimating performance; Making a reuse plan; Breaking asystem in to sub-systems; Identifying concurrency; Allocation of sub-systems; Management of datastorage; Handling global resources;

Choosing a software control strategy; Handling boundary conditions; Setting the trade-off priorities; Common architectural styles; Architecture of the ATM system as the example

#Exemplar/Case Studies	Case System of ATM System	
*Mapping of Course	CO3, CO4	
<b>Outcomes for Unit IV</b>		
Unit V Class Des	gn ,Implementation Modeling, Legacy Systems	06 Hours

Class Design: Overview of class design; Bridging the gap; Realizing use cases; Designing algorithms; Recursing downwards, Refactoring; Design optimization; Reification of behavior; Adjustment of inheritance; Organizing a class design; ATM example. Implementation Modeling: Overview of implementation; Fine-tuning classes; Fine-tuning generalizations; Realizing associations; Testing. Legacy Systems: Reverse engineering; Building the class models; Building the interaction model; Building the state model; Reverse engineering tips; Wrapping; Maintenance

<pre>#Exemplar/Case Studies</pre>	Case study of College Library System	
*Mapping of Course Outcomes for Unit V	CO4, CO5	
Unit VI	Design Pattern	<b>06 Hours</b>

What is a pattern and what makes a pattern? Pattern categories; Relationships between patterns; Patterndescription Communication Patterns: Forwarder-Receiver; Client-Dispatcher-Server; Publisher-Subscriber.

Management Patterns: Command processor; View handler. Idioms: Introduction; what can idioms provide? Idioms and style; Where to find idioms; Counted Pointer example

<b>⊤</b> Teaching Scheme:	Credit	Examination Scheme:
	03	In-Sem (Paper): 30 Marks
TH: 03 Hours/Week	05	End-Sem (Paper): 70 Marks
Prerequisite Courses: Engi	neering Mathematics III(207003)	
Companion Course: Labora	tory Practice IV(410247)	
Course Objectives:		
· ·	and representation and properties of	of signals and systems.
•	to analyze signals and systems	
	domain representation of signals a	and systems
•	d analysis of Discrete Time (DT) s	•
1 0	•	signals and systems
•	n of filters as DT systems	
• To get acquainted wit	h the DSP Processors and DSP ap	plications
CO2: Apply different view.	mathematical models and represent transforms like Fourier and Z-Tra	ntations of DT Signals and Systems ansform from applications point of
structuresand differer		systems as DT filters with filter as for design and analysis of systems
CO5: Apply knowled	ge and use the signal transforms for Filtering and Different Filter Struct	or digital processing applications
	<b>Course Contents</b>	
Unit I	Signals and Systems	08 Hours
Continuous time (CT), Disc	rete-time (DT) and Digital signals	s, Basic DT signals and Operations.
Systems, Impulse response, FIR and IIR systems, Period	•	
#Exemplar/Case Studies	Audio/Music Sampling	
* <u>Mapping of Course</u> Outcomes for Unit I	CO1	
	Domain Representation of Sig	gnal 08 Hours
Introduction to Fourier Se	eries, Representation of DT sig	gnal by Fourier Transform (FT),
	y, periodicity, time shifting, 1	

differentiation, convolution theorem, windowing theorem Discrete Fourier Transform (DFT), DFT

Faculty of Engineering	Savitribai P	hule Pune University
and FT, IDFT, Twiddle facto	or, DFT as linear transformation matrix, Properties	of DFT, circular
shifting, Circular Convoluti leakage	on, DFT as Linear filtering, overlap save and a	dd, DFT spectral
#Exemplar/Case Studies	Spectral Analysis using FFT	
*Mapping of Course	CO1	
Outcomes for Unit II		
Unit III Fast Fourier	r Transform (FFT) and Z-Transform(ZT)	08 Hours
Effective computation of DF	T, Radix-2 FFT algorithms: DIT FFT, DIF FFT, In	nverse DFT using
	and FT, ZT and DFT, ROC and its properties	· • •
convolution, initial value the	corem, Rational ZT, Pole Zero Plot, Behavior of c	ausal DT signals,
Inverse Z Transform (IZT): p	ower series method, partial fraction expansion (PFE	E), Residue
method.		
<u>#Exemplar/Case Studies</u>	Discrete Hilbert Algorithm	
*Mapping of Course	CO2	
<b>Outcomes for Unit III</b>		
Unit IV	Analysis of DT - LTI Systems	<b>08 Hours</b>
System function $H(z)$ , $H(z)$ is	n terms of Nth order general difference equation, al	poll and all zero
	ystem using $H(Z)$ , Unilateral Z-transform: soluti	-

* <u>Mapping of Course</u> Outcomes for Unit IV	CO3	
<u>Outcomes for Unit IV</u> Unit V	Digital Filter Degign	09 II.oung
Umt v	Digital Filter Design	<b>08 Hours</b>
Concept of filtering, Ideal fi	lters and approximations, specifications, FIR and I	IIR filters, Linear
phase response, FIR filter	r Design: Fourier Series method, Windowing	method, Gibbs
Phenomenon, desirable featur	res of windows, Different window sequences and its	s analysis, Design
examples IIR filter design:	Introduction, Mapping of S-plane to Z-plane, In	npulse Invariance
method, Bilinear Z transfor	mation (BLT) method, Frequency Warping, Pre-	-warping, Design
examples, Comparison of IIR	and FIR Filters.	
#Exemplar/Case Studies	Realization of an Analogue	
	Second-order Differentiator	
*Mapping of Course	CO5	
Outcomes for Unit V		
Unit VI Fil	ter Structures and DSP Processors	<b>08 Hours</b>
Filter Structures for FIR Sy	stems: direct form, cascade form, structures for	linear phase FIR
	ructures for IIR Systems: direct form, cascade for	-
•	DSP 21XX Features, comparison with conventiona	-
-	HARC DSP Processor Introduction to OMAP (Open	-
Application Platform).	(op.	
#Exemplar/Case Studies	Architectures and Design techniques for energy efficient	t embedded DSP

Fourth Year of Computer Engineering (2019 Course)						
	<b>Elective IV</b>					
410245 (D)	: Software Testing and Qu	uality Assurance				
Teaching Scheme:	Credit	Examination Scheme:				
TH: 03 Hours/Week	03	In-Sem (Paper): 30 Marks				
		End-Sem (Paper): 70 Marks				
		are Project Management(310245(D))				
Companion Course: Lab Pra	ctice IV					
Course Objectives:						
• Introduce basic	concepts of software testing.					
• Understand the l	best way to increase the effective	eness, test coverage, and				
-	in software testing.					
	te box, block box, object oriente	-				
• Understand the i development.	mportance of software quality a	nd assurance software systems				
• Know in details	automation testing and tools use	d for automation testing.				
	nderstand the combination of pr ionals test more efficiently.	actices and tools that are designed to				
<b>Course Outcomes:</b>						
On completion of the course, st	tudent will be able to-					
<b>CO1: Describe</b> fundament testingand software		such as manual testing, automation				
<b>CO2: Design and Develo</b> operations.	<b>p</b> project test plan, design test ca	ases, test data, and conduct test				
CO3: Apply recent autom	ation tool for various software to	esting for testing software.				
<b>CO4: Apply</b> different app softwaresystem.	proaches of quality management,	assurance, and quality standard to				
CO5: Apply and analyze	effectiveness Software Quality 7	Fools.				
CO6: Apply tools necess	ary for efficient testing framewo	rk.				
	<b>Course Contents</b>					
Unit I Introdu	ction to Software Testing	07 Hours				

**Introduction**: historical perspective, Definition, Core Components, Customers suppliers and process, Objectives of Testing, Testing and Debugging, Need of Testing, Quality Assurance and Testing, Why Software has Errors, Defects and Failures and its Causes and Effects, Total Quality Management(TQM), Quality practices of TQM, Quality Management through- Statistical process Control, Cultural Changes, Continual Improvement cycle, Benchmarking and metrics, Problem Solving Techniques and Software Tools. Software Quality, Constraints of Software product Quality assessment, Quality and Productivity Relationship, Requirements of Product, Software Development Process, Types of Products, Software Development Lifecycle Models, Software Quality Management, Processes related to Software Quality, Quality Management System's Structure, Pillars of Quality Management System, Important aspects of quality management.

#Exemplar/Case Studies	1. Offshore delivery model for an Airline Company.
	2. SAP test automation CoE for Financial Service Provider.

# Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) 410246: Laboratory Practice III

Teaching Scheme:	Credit	Examination Scheme:
Practical: 04	02	Term work: 50 Marks
Hours/Week		Practical: 50 Marks

**Companion Course:** Design and Analysis of Algorithms (410241), Machine Learning(410242), Blockchain Technology(410243)

**Course Objectives:** 

- Learn effect of data preprocessing on the performance of machine learning algorithms
- Develop in depth understanding for implementation of the regression models.
- Implement and evaluate supervised and unsupervised machine learning algorithms.
- Analyze performance of an algorithm.
- Learn how to implement algorithms that follow algorithm design strategies namely divide and conquer, greedy, dynamic programming, backtracking, branch and bound.
- Understand and explore the working of Blockchain technology and its applications.

# **Course Outcomes:**

After completion of the course, students will be able to

CO1: Apply preprocessing techniques on datasets.

CO2: Implement and evaluate linear regression and random forest regression models.

CO3: Apply and evaluate classification and clustering techniques.

CO4: Analyze performance of an algorithm.

CO5: Implement an algorithm that follows one of the following algorithm design strategies: divide and conquer, greedy, dynamic programming, backtracking, branch and bound.

CO6: Interpret the basic concepts in Blockchain technology and its applications

# **Guidelines for Instructor's Manual**

The instructor's manual is to be developed as a reference and hands-on resource. It should include prologue (about University/program/ institute/ department/foreword/ preface), curriculum of the course, conduction and assessment guidelines, topics under consideration, concept, objectives, outcomes, set of typical applications/assignments/ guidelines, and references.

# **Guidelines for Student's Laboratory Journal**

The laboratory assignments are to be submitted by students in the form of a journal. Journal consists of Certificate, table of contents, and handwritten write-up of each assignment (Title, Date of Completion, Objectives, Problem Statement, Software and Hardware requirements, Assessment grade/marks and assessor's sign, Theory- Concept in brief, algorithm, flowchart, test cases, Test Data Set(if applicable), mathematical model (if applicable), conclusion/analysis. Program codes with sample output of all performed assignments are to be submitted as a softcopy. As a conscious effort and little contribution towards Green IT and environment awareness, attaching printed papers as part of write-ups and program listing to a journal must be avoided. Use of DVD containing student programs maintained by Laboratory In-charge is highly encouraged. For reference one or two journals may be maintained with program prints in the Laboratory.

#### Guidelines for Laboratory /Term Work Assessment

Continuous assessment of laboratory work should be based on overall performance of Laboratory assignments by a student. Assessment of each Laboratory assignment will assign grade/marks based on parameters, such as timely completion, performance, innovation, efficient codes, punctuality, documentation and neatness.

#### **Guidelines for Practical Examination**

Problem statements must be decided jointly by the internal examiner and external examiner. During practical assessment, maximum weightage should be given to satisfactory implementation of the problem statement. Relevant questions may be asked at the time of evaluation to test the student's understanding of the fundamentals, effective and efficient implementation. This will encourage, transparent evaluation and fair approach, and hence will not create any uncertainty or doubt in the minds of the students. So, adhering to these principles will consummate our team efforts to the promising start of student's academics.

## **Guidelines for Laboratory Conduction**

The instructor is expected to frame the assignments by understanding the prerequisites, technological aspects, utility and recent trends related to the topic. The assignment framing policy needs to address the average students and inclusive of an element to attract and promote the intelligent students. Use of open source software is encouraged. Based on the concepts learned. Instructors may also set one assignment or mini-project that is suitable to each branch beyond the scope of the syllabus. Operating System recommended :- 64-bit Open source Linux or its derivative Programming tools recommended: - C++, Java, Python, Solidity, etc.

#### Virtual Laboratory:

- http://cse01-iiith.vlabs.ac.in/
- http://vlabs.iitb.ac.in/vlabs-dev/labs/blockchain/labs/index.php
- http://vlabs.iitb.ac.in/vlabs-dev/labs/machine\_learning/labs/index.php

# **Suggested List of Laboratory Experiments/Assignments.** Assignments from all the Groups (A, B, C) are compulsory.

# **Course Contents**

# Group A: Design and Analysis of Algorithms

Any 5 assignments and 1 mini project are mandatory.

- 1. Write a program non-recursive and recursive program to calculate Fibonacci numbers and analyze their time and space complexity.
- 2. Write a program to implement Huffman Encoding using a greedy strategy.
- 3. Write a program to solve a fractional Knapsack problem using a greedy method.
- 4. Write a program to solve a 0-1 Knapsack problem using dynamic programming or branch and bound strategy.
- 5. Design n-Queens matrix having first Queen placed. Use backtracking to place remaining Queens to generate the final n-queen's matrix.
  - 6. Write a program for analysis of quick sort by using deterministic and randomized variant.

7.	Mini Projects
	<b>Mini Project -</b> Write a program to implement matrix multiplication. Also implement multithreaded matrix multiplication with either one thread per row or one thread per cell. Analyze and compare their performance.
8.	<b>Mini Project -</b> Implement merge sort and multithreaded merge sort. Compare time required by both the algorithms. Also analyze the performance of each algorithm for the best case and the worst case.
9.	<b>Mini Project -</b> Implement the Naive string matching algorithm and Rabin-Karp algorithm for string matching. Observe difference in working of both the algorithms for the same input.
10	<b>Mini Project -</b> Different exact and approximation algorithms for Travelling-Sales-Person Problem
	Group B: Machine Learning
Any 5	assignments and 1 Mini project are mandatory.
1.	<ul> <li>Predict the price of the Uber ride from a given pickup point to the agreed drop-off location.</li> <li>Perform following tasks: <ol> <li>Pre-process the dataset.</li> <li>Identify outliers.</li> <li>Check the correlation.</li> </ol> </li> </ul>
	<ol> <li>Implement linear regression and random forest regression models.</li> <li>Evaluate the models and compare their respective scores like R2, RMSE, etc. Dataset link: <u>https://www.kaggle.com/datasets/yasserh/uber-fares-dataset</u></li> </ol>
2.	Classify the email using the binary classification method. Email Spam detection has two states: a) Normal State – Not Spam, b) Abnormal State – Spam. Use K-Nearest Neighbors and Support Vector Machine for classification. Analyze their performance. Dataset link: The emails.csv dataset on the Kaggle
	https://www.kaggle.com/datasets/balaka18/email-spam-classification-dataset-csv
3.	Given a bank customer, build a neural network-based classifier that can determine whether they will leave or not in the next 6 months. Dataset Description: The case study is from an open-source dataset from Kaggle. The dataset contains 10,000 sample points with 14 distinct features such as CustomerId, CreditScore, Geography, Gender, Age, Tenure, Balance, etc. Link to the Kaggle project: <u>https://www.kaggle.com/barelydedicated/bank-customer-churn-modeling</u>
	<ul> <li>Perform following steps:</li> <li>1. Read the dataset.</li> <li>2. Distinguish the feature and target set and divide the data set into training and test sets.</li> <li>3. Normalize the train and test data.</li> <li>4. Initialize and build the model. Identify the points of improvement and implement the same.</li> <li>5. Print the accuracy score and confusion matrix (5 points).</li> </ul>
4.	Implement Gradient Descent Algorithm to find the local minima of a function. For example, find the local minima of the function $y=(x+3)^2$ starting from the point $x=2$ .

5.	
5.	Implement K-Nearest Neighbors algorithm on diabetes.csv dataset. Compute confusion matrix, accuracy, error rate, precision and recall on the given dataset.
	Dataset link : <u>https://www.kaggle.com/datasets/abdallamahgoub/diabetes</u>
6.	Implement K-Means clustering/ hierarchical clustering on sales_data_sample.csv dataset. Determine the number of clusters using the elbow method.
	Dataset link : https://www.kaggle.com/datasets/kyanyoga/sample-sales-data
7.	Mini Project
	<b>Mini Project -</b> Use the following dataset to analyze ups and downs in the market and predict future stock price returns based on Indian Market data from 2000 to 2020.
	Dataset Link: https://www.kaggle.com/datasets/sagara9595/stock-data
8.	<b>Mini Project -</b> Build a machine learning model that predicts the type of people who survived the Titanic shipwreck using passenger data (i.e. name, age, gender, socio-economic class, etc.). Dataset Link: <u>https://www.kaggle.com/competitions/titanic/data</u>
9.	<b>Mini Project -</b> Develop a application for signature identification by creating your own dataset of your college student
	Group C: Blockchain Technology
Any 5	assignments and 1 Mini project are mandatory.
1.	Installation of MetaMask and study spending Ether per transaction.
2.	
	Create your own wallet using Metamask for crypto transactions.
3.	Create your own wallet using Metamask for crypto transactions. Write a smart contract on a test network, for Bank account of a customer for following operations: • Deposit money • Withdraw Money • Show balance
3.	<ul> <li>Write a smart contract on a test network, for Bank account of a customer for following operations:</li> <li>Deposit money</li> <li>Withdraw Money</li> </ul>
	<ul> <li>Write a smart contract on a test network, for Bank account of a customer for following operations:</li> <li>Deposit money</li> <li>Withdraw Money</li> <li>Show balance</li> </ul> Write a program in solidity to create Student data. Use the following constructs: <ul> <li>Structures</li> <li>Arrays</li> <li>Fallback</li> </ul>
4.	<ul> <li>Write a smart contract on a test network, for Bank account of a customer for following operations: <ul> <li>Deposit money</li> <li>Withdraw Money</li> <li>Show balance</li> </ul> </li> <li>Write a program in solidity to create Student data. Use the following constructs: <ul> <li>Structures</li> <li>Arrays</li> <li>Fallback</li> </ul> </li> <li>Deploy this as smart contract on Ethereum and Observe the transaction fee and Gas values.</li> </ul>

# Savitribai Phule Pune University Fourth Year of Computer Engineering(2019Course) 410247:Laboratory Practice IV

Teaching Scheme Practical: 02 Hours/Week	Credit 01	Examination Scheme : Term Work: 50 Marks
Companion Course: Elective III(4102	244 ), Elective IV(410245	)
<ul> <li>Course Objectives:</li> <li>Learn android application devel</li> <li>Understand various multimedia</li> </ul>	1 1	e computing

- Understand various vulnerabilities and use of various tools for assessment of vulnerabilities
- Understand information retrieval process using standard tools available
- Learn GPU programming and implementation of same using open source libraries
- Learn installation and use of open source software testing tools

# **Course Outcomes:**

After completion of the course, students will be able to

- CO1: Apply android application development for solving real life problems
- CO2: Design and develop system using various multimedia components.
- CO3: Identify various vulnerabilities and demonstrate using various tools.
- CO4: Apply information retrieval tools for natural language processing
- CO5: Develop an application using open source GPU programming languages

CO6: Apply software testing tools to perform automated testing

# **Guidelines for Instructor's Manual**

The instructor's manual is to be developed as a reference and hands-on resource. It should include prologue (about University/program/ institute/ department/foreword/ preface), curriculum of the course, conduction and Assessment guidelines, topics under consideration, concept, objectives, outcomes, set of typical applications/assignments/ guidelines, and references.

# **Guidelines for Student's Laboratory Journal**

The laboratory assignments are to be submitted by student in the form of journal. Journal consists of Certificate, table of contents, and handwritten write-up of each assignment (Title, Date of Completion, Objectives, Problem Statement, Software and Hardware requirements, Assessment grade/marks and assessor's sign, Theory- Concept in brief, algorithm, flowchart, test cases, Test Data Set(if applicable), mathematical model (if applicable), conclusion/analysis. Program codes with sample output of all performed assignments are to be submitted as softcopy. As a conscious effort and little contribution towards Green IT and environment awareness, attaching printed papers as part of write-ups and program listing to journal must be avoided. Use of DVD containing students programs maintained by Laboratory In-charge is highly encouraged. For reference one or two journals may be maintained with program prints in the Laboratory.

# **Guidelines for Laboratory/Term Work Assessment**

Continuous assessment of laboratory work should be based on overall performance of Laboratory assignments by a student. Each Laboratory assignment assessment will assign grade/marks based on parameters, such as timely completion, performance, innovation, efficient codes and punctuality.

# **Guidelines for Practical Examination**

Problem statements must be decided jointly by the internal examiner and external examiner. During practical assessment, maximum weightage should be given to satisfactory implementation of the

#### Faculty of Engineering

problem statement. Relevant questions may be asked at the time of evaluation to test the student's understanding of the fundamentals, effective and efficient implementation. This will encourage, transparent evaluation and fair approach, and hence will not create any uncertainty or doubt in the minds of the students. So, adhering to these principles will consummate our team efforts to the promising start of student's academics.

# **Guidelines for Laboratory Conduction**

The instructor is expected to frame the assignments by understanding the prerequisites, technological aspects, utility and recent trends related to the topic. The assignment framing policy need to address the average students and inclusive of an element to attract and promote the intelligent students. Use of open source software is encouraged. Based on the concepts learned. Instructor may also set one assignment or mini-project that is suitable to respective branch beyond the scope of syllabus.

# Virtual Laboratory:

- <u>https://hci-iitg.vlabs.ac.in/</u>
- <u>http://vlabs.iitkgp.ernet.in/se/</u>
- <u>https://vlab.amrita.edu/?sub=3&brch=179&sim=1293&cnt=2</u>

410244(A): Pervasive Computing

Any 5 assignments from group 1 and 1 Mini project from group 2 is mandatory.

#### Group 1

- **1.** Develop an indoor location system to Library guide system where it can direct a user to the bookshelf from a mobile device.
- 2. Design a pervasive application in which remote computer monitors our health statistics & will determine when one is in trouble & will take appropriate action for rescue.
- **3.** Develop an Android application in which car will use the Internet to find nearby open parking space.
- 4. Android User Activity Recognition Still, Walking, Running, Driving etc.
- 5. Design and build a sensing system using micro-controllers like Arduino / Raspberry Pi / Intel Galileo to sense the environment around them and act accordingly.
- **6.** Smart Mobile Application with orientation sensing for users to put the phone in meeting / silent mode- OR- outdoor/ loud mode based on the orientation of the device.

Group 2

- **7. PMini project:** Develop Food Ordering System which uses the GPS of an Android-based Smartphone to record and analyze various locations that could give alert to the user, then asking the user to select particular food from given hotel list and place an order.
- 8. Mini Project: Design a mobile sensing platform mounted on a glove that integrates several sensors, such as touch pressure, imaging, inertial measurements, localization and a Radio Frequency Identification (RFID) reader for fruit classification and grading system.
- **9. Mini Project:** Sensor-Based Assistive Devices for Visually Impaired People. It should cover following points:
  - Determining obstacles around the user body from the ground to the head;
  - Affording some instructions to the user about the movement surface consists of gaps or textures;
  - Finding items surrounding the obstacles;
  - Providing information about the distance between the user and the obstacle with essential direction instructions.

Savitribai Phule Pune University         ni Project:       Develop a Real time application like a smart home with following         uirements:       If anyone comes at door the camera module automatically captures his image         d it to the email account of user or send notification to the user. Door will open only after         r's approval.         410244(B):       Multimedia Techniques         nments from group 1 and 1 Mini project from group 2 is mandatory.         udy and install open-source multimedia tools and create an application using appropriate         o design the college webpage         reate JPEG Image that demonstrates various features of an Image editing tool.         re or play a sample MIDI format sound file using LMMS / MuseScore / Tuxguitar software         Edit the sample file by applying effects like bend, slide, vibrato, and hammer-on/pull-off.         rt / Convert final MIDI to WAV file format.
d it to the email account of user or send notification to the user. te or play a sample MIDI format sound file using LMMS / MuseScore / Tuxguitar software Edit the sample file by applying effects like bend, slide, vibrato, and hammer-on/pull-off.
Edit the sample file by applying effects like bend, slide, vibrato, and hammer-on/pull-off.
rt / Convert final MIDI to WAV file format
ement transform coding, quantization, and hierarchical coding for the encoder and decoder
ree-level Hierarchical JPEG.
e an immersive environment (living room/ battlefield/ tennis court) with only static game
ts. 3D game objects can be created using Blender or use available 3D models.
te a web page for a clothing company which contains all the details of that company and st five links to other web pages.
Project: Design and develop a Navigation Assistance System.
Project: Design and Develop a Traffic Monitoring System.
<b>Project:</b> Design and develop a Tool for converting image format (e.g. bmp to jpeg )
<b>Project:</b> Design and develop a Tool for converting audio format (e.g. wav to mp3)
410244(C): Cyber Security and Digital Forensics
nments from group 1 and 1 Mini project from group 2 is mandatory.
e a program for Tracking Emails and Investigating Email Crimes. i.e. Write a program to yze e-mail header
ement a program to generate and verify CAPTCHA image
rson on a nearby road is trying to enter into a WiFi network by trying to crack the Password
se the IP Printer resource; write a program detect such attempt and prohibit the access
r e

	Faculty of Engineering Savitribai Phule Pune University
4.	Write a computer forensic application program for Recovering permanent Deleted Files and Deleted Partitions
5.	Write a program for Log Capturing and Event Correlation
6.	Configure and demonstrate use of vulnerability assessment tool like Wireshark or SNORT
7.	Study of Honeypot
Grou	p 2
8.	Mini-project- Design and develop a tool for digital forensic of images
9.	Mini Project - Design and develop a tool for digital forensic of audio
10.	Mini Project -: Design and develop a tool for digital forensic of video
11.	Mini Project - Design a system for the analysis of cyber crime using various cyber forensic techniques and compare each technique with respect to integrity, confidentiality, availability
	410244(D): Object Oriented Modeling And Design
Any 5	assignments from group 1 and 1 Mini project from group 2 is mandatory.
Group	p1
1.	Draw state model for telephone line, with various activities.
2.	Draw basic class diagrams to identify and describe key concepts like classes, types in your system and their relationships.
3.	Draw one or more Use Case diagrams for capturing and representing requirements of
5.	the system. Use case diagrams must include template showing description and steps of the Use Case for various scenarios.
4.	Draw one or more Use Case diagrams for capturing and representing requirements of the system. Use case diagrams must include template showing description and steps of the Use Case for various scenarios.
5.	Draw activity diagrams to display either business flows or like flow charts
6.	Draw component diagrams assuming that you will build your system
	reusing existing components along with a few new ones
7.	Draw deployment diagrams to model the runtime architecture of your system.
Group	p1
8.	Mini Project: Draw all UML diagrams for your project work.
9.	Mini Project - Develop a Blockchain based application for health related medical records
	Draw following UML Diagrams for Bank Management application
	a. Class Diagram
	b. Object Diagram
	c. ER Diagram d. Component Diagram
	410244(E): Digital Signal Processing
Any 5	assignments from group 1 and 1 Mini project from group 2 is mandatory
Group	p1
1.	Develop a program to generate samples of sine, Cosine and exponential signals at specified

sampling frequency and signal parameters. (Test the results for different analog frequency (F) and Syllabus for Fourth Year of Computer Engineering #59/128

**Faculty of Engineering** Savitribai Phule Pune University sampling frequency (Fs) ). 23. 4. 5. 6. 7. 2. Find the output of a system described by given difference equation and initial conditions for given input sequence. (Solution of difference equation) (Obtain the response for different systems by changing Degree of difference equation (N) and coefficients and also for different input sequence x(n). Observe the response by considering system as FIR and IIR system). 3. Write a program to plot the magnitude and phase response of a Fourier Transform (FT). (Observe the spectrum for different inputs. Observe the Periodicity). **4.** Find the N point DFT / IDFT of the given sequence x (n). Plot the magnitude spectrum |X(K)| Vs K. (Analyze the output for different N and the same input sequence x(n). Also observe the periodicity and symmetry property). 5. Find the N point circular convolution of given two sequences. Test it for Linear convolution. Compute the circular convolution of given two sequences using DFT and IDFT. **6.** Develop a program to plot the magnitude and phase response of a given system (given: h(n): impulse response of system S) (Observe the frequency response for different systems. Compare the frequency response of a system (filter) for different length h(n) i.e filter coefficients). Group 2: 7. Mini-Project: Design and Develop the N-point radix-2 DIT or DIF FFT algorithm to find DFT or IDFT of given sequence x (n). (Analyze the output for different N. Program should work for any value of N and output should be generated for all intermediate stages.) 89. 8. Mini-Project: Obtain the Fourier transform of different window functions to plot the magnitude and phase spectrums. (Window functions: Rectangular, Triangular, Bartlett, Hamming, Henning, Kaiser. Observe and compare the desirable features of window sequences for different length. Observe the main and side lobes). 9. Mini-Project: Design an FIR filter from given specifications using windowing method. (Application should work for different types of filter specifications i.e. LPF, HPF, BPF etc and all window sequences. Plot the frequency response for different frequency terms i.e. analog and DT frequency). 10. 10 Mini-Project: Design of IIR filter for given specifications using Bilinear Transformation. (Generalized code to accept any filter length for a transfer function H(Z). Application should work for different types of filter specifications that is LPF, HPF, BPF etc. and for different transfer functions of an analog filter). 410245(A): Information Retrieval Any 5 assignments from group 1 and 1 Mini project from group 2 is mandatory Group 1 **1.** Write a program to Compute Similarity between two text documents. 2. Implement Page Rank Algorithm. **3.** Write a program for Pre-processing of a Text Document: stop word removal. 4. Write a map-reduce program to count the number of occurrences of each alphabetic character in the given dataset. The count for each letter should be case-insensitive (i.e., include both uppercase and lower-case versions of the letter; Ignore non-alphabetic characters). 5. Write a program to implement simple web crawler. 6. Write a program to parse XML text, generate Web graph and compute topic specific page Group 2

7.	Faculty of Engineering         Savitribai Phule Pune University           Mini project: Develop Document summarization system         Savitribai Phule Pune University				
	Mini Project: Develop Tweet sentiment analysis system				
9.	9. Mini Project: Develop Fake news detection system				
10	Mini Project: Develop a Abstractive summarization system				
	410245(B): GPU Programing And Architecture				
Any 5	assignments from group 1 and 1 Mini project from group 2 is mandatory				
Grou	p 1				
1.	Write a program using OpenCL for Heterogeneous computing				
2.	Write CUDA programming with some simple things such as dot product, calculation of pi using integration method etc.				
3.	Write CUDA programming for matrix transpose and matrix multiplication				
4.	Write OpenCL "Hello World" basic program				
	5. Develop program using combining abilities of OpenGL and CUDA to accelerate the performance of simple graphics.				
6.	Case study on "Review of traditional Computer Architecture"				
Group	o 2:				
7	Mini Project : Huge data computation				
8	Mini Project : Visualization to develop project for image processing and then video processing				
9	Mini Project : Parallel Algorithm for Searching				
10	Mini Project : Parallel Algorithm for Sorting				
	410245(C): Mobile Computing				
Any 5	assignments from group 1 and 1 Mini project from group 2 is mandatory				
Grou	p 1				
1.	To implement a basic function of Code Division Multiple Access (CDMA) to test the orthogonally and autocorrelation of a code to be used for CDMA operation. Write an application based on the above concept.				
2.	Implementation of GSM security algorithms (A3/A5/A8)				
3.	<b>B.</b> Write an application that draws basic graphical primitives on the screen.				
4.	Develop a native application that uses GPS location information.				
5.	Design an android Application for Frame Animation				
6.	Create a simulation to show working of 3G Mobile network				
7.	Create a simulation to show working of 4G Mobile network				

•

Group 2

	Faculty of Engineering         Savitribai Phule Pune University						
8.	Mini Project: Create an application for Bank using spinner, intent						
	i) Form 1: Create a new account for customer						
	ii) Form 2: Deposit money in customer account.						
	iiii) Link both forms, after completing of first form the user should be directed to second form						
	iv) Provide different menu options						
9.	Mini Project: Create the module for collecting cellular mobile network performance						
	parameters using telephony API Manager						
	i) Nearest Base Station						
	ii) Signal Strengths						
	iii) SIM Module Details						
	iv) Mobility Management Information						
10	Mini Project: Create the module for payment of fees for College by demonstrating the						
	following methods.						
	i) FeesMethod()- for calculation of fees						
	ii) Use customized Toast for successful payment of fees						
	iii) Implement an alarm in case someone misses out on the fee submission						
	deadline						
	iv) Demonstrate the online payment gateway						
11	Mini Project: Create an app to add of a product to SQLite database and make sure to add						
	following features						
	i) SMS messaging and email provision ii) Bluetooth options						
	iii) Accessing Web services iv) Asynchronous remote method call						
	v) Use Alert box for user notification						
	410245(D): Software Testing and Quality Assurance						
Any 5	assignments from group 1 and 1 Mini project from group 2 is mandatory						
Grou	01:						
1.	Write TEST Scenario for Gmail Login Page						
2.	Test Scenario for Gmail Login Page						
3.	Write Test cases in excel sheet for Social Media application or website						
4.	Create Defect Report for Any application or web application						
5.	Installation of Selenium grid and selenium Web driver java eclipse (automation tools).						
6.	Prepare Software requirement specification for any project or problem statement						
Gro	p 2:						
7.	Mini Project :Software Testing and Quality Assurance Mini Project Dynamic website of covid-						
	19 information using HTML, CSS, JAVASCRIPT And PHP, MySQL database used to store						
	user account, comment, and registration form details. Regular Expression testcases for testing						
	purpose						
8.	Mini Project : Create a small application by selecting relevant system environment / platform						
	and programming languages. Narrate concise Test Plan consisting features to be tested and bug						
	taxonomy. Prepare Test Cases inclusive of Test Procedures for identified Test Scenarios.						

			Engineer									Phule Pune	
	Perform selective Black-box and White-box testing covering Unit and Integration test by using suitable Testing tools. Prepare Test Reports based on Test Pass/Fail Criteria and judge the acceptance of application developed												
9.	<ul> <li>Mini Project : Create a small web-based application by selecting relevant system environment / platform and programming languages. Narrate concise Test Plan consisting features to be tested and bug taxonomy. Narrate scripts in order to perform regression tests. Identify the bugs using Selenium WebDriver and IDE and generate test reports encompassing exploratory testing.</li> </ul>

# Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) 410248: Project Work Stage I

410240. 110jeet Work Stage 1				
<b>Teaching Scheme:</b>	Credit	<b>Examination Scheme:</b>		
	02			
Practical:02Hours/Week		Presentation:50Marks		

## **Course Objectives:**

- To Apply the knowledge for solving realistic problem
- To develop problem solving ability
- To Organize, sustain and report on a substantial piece of team work over a period of several months
- To Evaluate alternative approaches, and justify the use of selected tools and methods
- To Reflect upon the experience gained and lessons learned
- To Consider relevant social, ethical and legal issues
- To find information for yourself from appropriate sources such as manuals, books, research journals and from other sources, and in turn increase analytical skills.
- To Work in Team and learn professionalism

#### **Course Outcomes:**

On completion of the course, student will be able to-

- Solve real life problems by applying knowledge.
- Analyze alternative approaches, apply and use most appropriate one for feasible solution.
- Write precise reports and technical documents in a nutshell.
- Participate effectively in multi-disciplinary and heterogeneous teams exhibiting team work
- Inter-personal relationships, conflict management and leadership quality.

#### Guidelines

Project work Stage – I is an integral part of the Project work. In this, the student shall complete the partial work of the Project which will consist of problem statement, literature review, SRS, Model and Design. The student is expected to complete the project at least up to the design phase. As a part of the progress report of project work Stage-I, the candidate shall deliver a presentation on the advancement in Technology pertaining to the selected project topic. The student shall submit the duly certified progress report of Project work Stage-I in standard format for satisfactory completion of the work by the concerned guide and head of the Department/Institute. The examinee will be broadly based on work undergone, content delivery, presentation skills, documentation, question-answers and report.

#### Follow guidelines and formats as mentioned in Project Workbook recommended by Board of Studies

# Savitribai Phule Pune University Fourth Year of Engineering (2019 Course) 410249: Audit Course 7

In addition to credits, it is recommended that there should be audit course, in preferably in each semester starting from second year in order to supplement students' knowledge and skills. Student will be awarded the bachelor's degree if he/she earns specified total credit [1] and clears all the audit courses specified in the curriculum. The student will be awarded grade as AP on successful completion of audit course. The student may opt for one of the audit courses per semester, starting in second year first semester. Though not mandatory, such a selection of the audit courses helps the learner to explore the subject of interest in greater detail resulting in achieving the very objective of audit course's inclusion. List of options offered is provided. Each student has to choose one audit course from the list per semester. Evaluation of audit courses are suggested.

#### Criteria

The student registered for audit course shall be awarded the grade AP (Audit Course Pass) and shall be included such AP grade in the Semester grade report for that course, provided student has the minimum attendance as prescribed by the Savitribai Phule Pune University and satisfactory performance and secured a passing grade in that audit course. No grade points are associated with this 'AP' grade and performance in these courses is not accounted in the calculation of the performance indices SGPA and CGPA. Evaluation of audit course will be done at Institute level itself [1]

Guidelines for Conduction and Assessment (Any one or more of following but not limited to):

- Lectures/ Guest Lectures
  - Visits (Social/Field) and reports
- Surveys
- Mini-Project
- Demonstrations or presentations
- Hands on experience on focused topic

**Course Guidelines for Assessment** (Any one or more of following but not limited to):

• Written Test

•

- Demonstrations/ Practical Test
- Presentation or Report

Audit Course 5 Options				
Audit Course Code	Audit Course Title			
AC7-I	MOOC- Learn New Skills			
AC7-II	Entrepreneurship Development			
AC7-III	Botnet of Things			
AC7-IV	3D Printing			
AC7-V	Industrial Safety and Environment Consciousness			

# Savitribai Phule Pune University Fourth Year of Engineering (2019 Course) 410249: Audit Course 7 AC7 – I: MOOC-learn New Skill

This course aims to create awareness among the students regarding various courses available under MOOC and learn new skills through these courses.

#### **Course Objectives:**

- To promote interactive user forums to support community interactions among students, professors, and experts
- To promote learn additional skills anytime and anywhere •
- To enhance teaching and learning on campus and online

# **Course Outcomes:**

On completion of the course, , students will be able to CO1: To acquire additional knowledge and skill.

# **About Course**

MOOCs (Massive Open Online Courses) provide affordable and flexible way to learn new skills, pursue lifelong interests and deliver quality educational experiences at scale. Whether you'reinterested in learning for yourself, advancing your career or leveraging online courses to educate your workforce, SWYAM, NPTEL, edx or similar ones can help. World's largest SWAYAM MOOCs, a new paradigm of education for anyone, anywhere, anytime, as per your convenience, aimed to provide digital education free of cost and to facilitate hosting of all the interactive courses prepared by the best more than 1000 specially chosen faculty and teachers in the country. SWAYAM MOOCs enhances active learning for improving lifelong learning skills by providing easy access to global resources.

SWAYAM is a programme initiated by Government of India and designed to achieve the three cardinal principles of Education Policy viz., access, equity and quality. The objective of this effortis to take the best teaching learning resources to all, including the most disadvantaged. SWAYAM seeks to bridge the digital divide for students who have hitherto remained untouched by the digital revolution and have not been able to join the mainstream of the knowledge economy. This is done through an indigenous developed IT platform that facilitates hosting of all the courses, taught in classrooms from 9th class till post-graduation to be accessed by anyone, anywhere at any time. All the courses are interactive, prepared by the best teachers in the country and are available, free of cost to the residents in India. More than 1,000 specially chosen faculty and teachers from across the Country have participated in preparing these courses.

The courses hosted on SWAYAM is generally in 4 quadrants -(1) video lecture, (2) specially prepared reading material that can be downloaded/printed (3) self-assessment tests through tests and guizzes and (4) an online discussion forum for clearing the doubts. Steps have been taken to enrich the learning experience by using audio-video and multi-media and state of the art pedagogy / technology. In order to ensure best quality content are produced and delivered, seven National Coordinators have been appointed: They are NPTEL for engineering and UGC for post-graduation education.

# **Guidelines:**

Instructors are requested to promote students to opt for courses (not opted earlier) with proper mentoring. The departments will take care of providing necessary infrastructural and facilities for the learners.

# Savitribai Phule Pune University, Pune Fourth Year of Computer Engineering (2019 Course) 410249: Audit Course 7 AC7 – II: Entrepreneurship Development

This Course aims at instituting Entrepreneurial skills in the students by giving an overview of, who the entrepreneurs are and what competences are needed to become an entrepreneur

#### **Course Objectives:**

- To introduce the aspects of Entrepreneurship
- To acquaint with legalities in product development
- To understand IPR, Trademarks, Copyright and patenting
- To know the facets of functional plans, Entrepreneurial Finance and Enterprise Management

#### **Course Outcomes:**

On completion of the course, learner will be able to-

- CO1: Understand the legalities in product development
- CO2: Undertake the process of IPR, Trademarks, Copyright and patenting

CO3: Understand and apply functional plans

CO4: Manage Entrepreneurial Finance

CO5: Inculcate managerial skill as an entrepreneur

# **Course Contents**

**1. Introduction:** Concept and Definitions, Entrepreneur v/s Intrapreneur; Role of entrepreneurship in economic development; Entrepreneurship process; Factors impacting emergence of entrepreneurship; Managerial versus entrepreneurial Decision Making; Entrepreneur v/s Investors; Entrepreneurial attributes and characteristics; Entrepreneurs versus inventors; Entrepreneurial Culture; Women Entrepreneurs; Social Entrepreneurship; Classification and Types of Entrepreneurs; EDP Programmers; Entrepreneurial Training; Traits/Qualities of an Entrepreneurs.

**2. Creating Entrepreneurial Venture :** Generating Business idea- Sources of Innovation, methods of generating ideas, Creativity and Entrepreneurship; Business planning process; Drawing business plan; Business plan failures; Entrepreneurial leadership – components of entrepreneurial leadership; Entrepreneurial Challenges; Legal issues – forming business entity, considerations and Criteria, requirements for formation of a Private/Public Limited Company, Intellectual Property Protection - Patents Trademarks and Copyrights.

**3. Functional plans:** Marketing plan–for the new venture, environmental analysis, steps in preparing marketing plan, marketing mix, contingency planning; Organizational plan – designing organization structure and Systems; Financial plan – pro forma income statements, Ratio Analysis.

**4. Entrepreneurial Finance:** Debt or equity financing, Sources of Finance - Commercial banks, private placements, venture capital, financial institutions supporting entrepreneurs; Lease Financing; Funding opportunities for Startups in India. 5. Enterprise Management: Managing growth and sustenance- growth norms; Factors for growth; Time management, Negotiations, Joint ventures, Mergers and acquisition Books:

1. Kumar, Arya, `` Entrepreneurship: Creating and Leading an Entrepreneurial Organization"", Pearson ISBN-10: 8131765784; ISBN-13: 978-8131765784

2. Hishrich., Peters, ``Entrepreneurship: Starting, Developing and Managing a New Enterprise", ISBN 0-256-14147-9

3. Irwin Taneja, ``Entrepreneurship,'" Galgotia Publishers. ISBN: 978-93-84044-82-4

4. Charantimath, Poornima, ``Entrepreneurship Development and Small Business Enterprises,"" Pearson Education, ISBN, 8177582607, 9788177582604.

# Savitribai Phule Pune University, Pune Fourth Year of Computer Engineering (2019 Course) 410249: Audit Course 7 AC7 – III: Botnet of Things

This course aims to provide an understanding of the various security attacks and knowledge to recognize and remove common coding errors that lead to vulnerabilities. It gives an outline of the techniques for developing a secure application.

#### **Course Objectives:**

- To Understand the various IoT Protocols
- To Understand the IoT Reference Architecture and Real World Design Constraints
- To learn the concept of Botnet

#### **Course Outcomes:**

On completion of the course, learner will be able to-

CO1: Implement security as a culture and show mistakes that make applications vulnerable to attacks. CO2: Understand various attacks like DoS, buffer overflow, web specific, database specific, web -spoofing attacks.

CO3: Demonstrate skills needed to deal with common programming errors that lead to most security problems and to learn how to develop secure applications

#### **Course Contents**

# 1. Introduction

#### 2. IRC-Based Bot Networks

#### 3. Anatomy of a Botnet: The Gaobot Worm

**4. IoT Senosors and Security :** Sensors and actuators in IoT, Communication and networking in IoT, Real-time data collection in IoT, Data analytics in IoT, IoT applications and requirements, Securitythreats and techniques in IoT, Data trustworthiness and privacy in IoT, Balancing utility and other design goals in IoT, Future of Botnets in the Internet of Things, Thingbots, Elements of Typical IRC Bot Attack , Malicious use of Bots and Botnet

**5. Service Layer Protocols and Security :** Security: PHP Exploits, Cross-Site Scripting and Other Browser-Side Exploits, Bots and Botnets, Service Layer -oneM2M, ETSI M2M, OMA, BBF – Security in IoT Protocols –MAC 802.15.4 , 6LoWPAN, RPL, Application Layer Transport and Session layer protocols-transport Layer (TCP, MPTCP, UDP, DCCP, SCTP) - (TLS, DTLS) –

Session Layer - HTTP, CoAP, XMPP, AMQP, MQTT

# Savitribai Phule Pune University Fourth Year of Engineering (2019 Course) 410249: Audit Course 7 AC7 – IV: 3D Printing

This course aims to provide knowledge of 3D printing devices and explore the business side of 3D printing.

#### **Course Objectives:**

- To **acquire** basic knowledge of drafting terminology and construction of geometrical figures using drawing instruments, procedure to prepare a drawing sheet as per SP-46:2003
- To **inculcate** skill of technical sketching, multi-view drawings, Lettering, tolerance, and metricconstruction
- To **impart** practical aspects to generate detailed and assembly views with dimensions, annotations, in 3D Modeling software.
- To **develop** prototype/ end use product for 3D Printing

## **Course Outcomes:**

On completion of the course, learner will be able to-

**CO1: Understand** the basic knowledge of Shop Floor Safety rules and regulations basics of Machinetools and 3D printing machines

CO2: Understand the concept of concept of technical sketching, multi-view drawings,

Lettering, tolerance, and metric construction

**CO3:Identify and Distinguish** drafting terminologies and construction of geometrical figures using drawing instruments, procedure to prepare a drawing sheet as per SP-46:2003

**CO4:Describe and Explain** practical aspects to generate detailed and assembly views with dimensions, annotations, in 3D Modeling software.

**CO5: Apply** concepts and **Fabricate** the simple mechanical parts, prototype/ end use product for 3D Printing

## **Course Contents**

**1. Getting Started with 3D Printing:** How 3D Printers Fit into Modern Manufacturing, Exploring the Types of 3D Printing, Exploring Applications of 3D Printing.

**2. Outlining 3D Printing Resources:** Identifying Available Materials for 3D Printing, Identifying Available Sources for 3D Printable Objects.

**3. Exploring the Business Side of 3D Printing:** Commoditizing 3D Printing, Understanding 3D Printing's Effect on Traditional lines of Business, Reviewing 3D Printing Research.

**4. Employing Personal 3D printing Devices:** Exploring 3D printed Artwork, Considering Consumer level 3D Printers, Deciding on RepEap of Your Own.

#### **Books:**

**1.** Richard Horne, Kalani Kirk Hausman, "3D Printing for Dummies", Taschenbuch, ISBN: 9781119386315

**2.** Greg Norton, "3D Printing Business - 3D Printing for Beginners - How to 3D Print",ISBN:9781514785669

**2.** Liza Wallach Kloski and Nick Kloski, "Getting Started with 3D Printing: A Hands-on Guide to the Hardware, Software, and Services Behind the New Manufacturing Revolution", Maker Media, ISBN: 1680450204

**4**.Jeff Heldrich, "3D Printing: Tips on Getting Started with 3D Printing to Help you make Passive income for your Business"

# Savitribai Phule Pune University, Pune Fourth Year of Computer Engineering (2019 Course) 410249: Audit Course 7

AC7 – V: Industrial Safety and Environment Consciousness

This course aims to provide knowledge of industrial safety performance planning and accident prevention.

#### **Course Objectives:**

- To understand Industrial hazards and Safety requirements with norms
- To learn the basics of Safety performance planning
- To know the means of accident prevention
- To understand the impact of industrialization on environment
- To know the diversified industrial requirements of safety and security

#### **Course Outcomes:**

On completion of the course, learner will be able to-

- CO1: Develop the plan for Safety performance
- CO2: Demonstrate the action plan for accidents and hazards
- CO3: Apply the safety and security norms in the industry
- CO4: Evaluate the environmental issues of Industrialization

## **Course Contents**

**1. Introduction:** Elements of safety programming, safety management, Upgrading developmental programmers: safety procedures and performance measures, education, training and development in safety.

#### 2. Safety Performance Planning

Safety Performance: An overview of an accident, It is an accident, injury or incident, The safety professional, Occupational health and industrial hygiene. Understanding the risk: Emergency preparedness and response, prevention of accidents involving hazardous substances.

# **3. Accident Prevention**

What is accident prevention?, Maintenance and Inspection, Monitoring Techniques, General Accident Prevention, Safety Education and Training.

#### 4. Organization Safety

Basic Elements of Organized Safety, Duties of Safety Officer, Safe work Practices, Safety Sampling and Inspection, Job Safety Analysis(JSA), Safety Survey, On- site and Off-site Emergency Plan, Reporting of Accidents and Dangerous Occurrences.

#### 5. Industrial Pollution

Introduction, Work Environment, Remedy, pollution of Marine Environment and Prevention, Basic Environmental Protection Procedures, Protection of Environment in Global Scenario, Greenhouse Gases, Climate Change Impacts, GHG Mitigation Options, Sinks and Barriers,

## 6. Industrial Security(Industry wise)

General security Systems in Factories, Activation Security, Computer Security, Banking Security, V.I.P. Security, Women Security, Event Security, Security in Open Environments.

#### **Books**:

**1.** Basudev Panda ,"Industrial Safety, Health Environment and Security",Laxmi Publications, ISBN-10: 9381159432, 13: 978-9381159439

# SEMESTER VIII

# Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) 410250: High Performance Computing

410250: High Performance Computing						
<b>Teaching Scheme:</b>	Credit	Examination Scheme:				
TH: 3 Hours/Week	3	In- Sem (TH) : 30				
		End- Sem (TH): 70				
Prerequisites Courses: -M	licroprocessor (210254), Principle	s of Programming				
	ter Networks and Security(310244	4)				
Companion Course: Labor	ratory Practice V(410254)					
Course Objectives:						
	rent parallel programming models					
	ormance and modeling of parallel					
	ous techniques to parallelize the a	Igorithm				
1 1	el communication operations.					
• To discriminate CU	DA Architecture and its componer	nts.				
	be of Parallel Computing and its se	earch algorithms.				
<b>Course Outcomes:</b>						
CO1: Understand v	arious Parallel Paradigm					
CO2: Design and D	evelop an efficient parallel algorith	nm to solve given problem				
CO3: Illustrate data	communication operations on var	ious parallel architecture				
	neasure performance of modern pa	1 0 1				
CO5: Apply CUDA	architecture for parallel programm	iing				
CO6: <b>Analyze</b> the pe	erformance of HPC applications					
	Course Contents					
Unit I Introd	uction to Parallel Computing	09 Hours				
		lelism, Modern Processor: Stored-				
1 0 1	· · · ·	d Microprocessor architecture. <b>Parallel</b>				
	<b>Programming Platforms:</b> Implicit Parallelism, Dichotomy of Parallel Computing Platforms,					
Physical Organization of Parallel Platforms, Communication Costs in Parallel Machines. Levels of parallelism, <b>Models:</b> SIMD, MIMD, SIMT, SPMD, Data Flow Models, Demand-driven						
· ·	s: N-wide superscalar architecture					
#Exemplar/Case						
Studies	Case study: Multi-core System					
*Mapping of Course						
Outcomes for Unit I CO1						
Unit IIParallel Algorithm Design09 Hours						
Global System for Mobile Communications (GSM) architecture , Mobile Station, Base Station						
System, Switching subsystem, Security, Data Services, HSCSD, GPRS - GPRS system and						
protocol architecture 2.3 UTRAN, UMTS core network; Improvements on Core Network, 802.11						
Architecture 802.11a, 802.11b standard						
<b>#Exemplar/Case</b> IPoC: A New Core Networking Protocol for 5G Networks.						
Studies

	<b>Elective V</b>	
4102	52(A): Natural Language P	rocessing
<b>Feaching Scheme:</b>	Credit	Examination Scheme:
TH: 03 Hours/Week	03	In-Sem (Paper): 30 Marks End-Sem (Paper): 70 Marks
Prerequisite Courses: Discr	ete Mathematics (210241), Theo	
Data Science and Big Data An		
Companion Course: Laborate	ory Practice VI(410255)	
Course Objectives:		
• To be familiar with f processing (NLP)	fundamental concepts and technic	ques of natural language
• To acquire the know tasks	ledge of various morphological	, syntactic, and semantic NLP
• To develop the variou	s language modeling techniques f	or NLP
• To use appropriate too	ols and techniques for processing i	natural languages
• To comprehend the ac	lvance real world applications in N	NLP domain.
To Describe Application	ions of NLP and Machine Transla	tions.
Course Outcomes:		
CO2: Analyze Natural 1 Describe the concepts of CO3: Illustrate various la CO4: Integrate the NLP	amental concepts of NLP, challeng anguages morphologically, syntac morphology, syntax, semantics of anguage modelling techniques techniques for the information retu- se of NLP tools and techniques for	ctical and semantically OR natural language rieval task
	<b>Course Contents</b>	
Unit I Introd	luction to Natural Language Pro	ocessing 07 Hours
Natural Languages, Are nat Challenges and Issues(Open I	ural languages regular? Finite a Problems) in NLP kenization, Stemming, Lemmatiza Why English is not a regular lang	1 00 0
Mapping of Course	C01	
Dutcomes for Unit I		
Unit II Lang	guage Syntax and Semantics	07 Hours

&Derivational morphology, N Syntactic Analysis: Syntacti Probabilistic context-free grat Semantic Analysis: Lexical	hat is Morphology? Types of Morphemes, Inflectional Morphological parsing with Finite State Transducers (F c Representations of Natural Language, Parsing Algor mmars, and Statistical parsing Semantic, Relations among lexemes & their sense hymy, Hyponymy, WordNet, Word Sense Disambigua	FST) ithms, es –
Unit III	Language Modelling	07 Hours
Models, Graph-based Models <b>N-gram models:</b> Simple n language models, <b>Word En</b> doc2vec, Contextualized repr	gram models, Estimation parameters and smoothin nbeddings/ Vector Semantics: Bag-of-words, TFI	ng, Evaluating DF, word2vec,
#Exemplar/Case Studies	Study of language modelling for Indian languages.

# Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) Elective V

## 410252 (B): Image Processing

Teaching Scheme: TH: 03 Hours/Week	Credit 03	Examination Scheme: In-Sem (Paper): 30 Marks End-Sem (Paper): 70 Marks					
Prerequisites Courses: Discrete Mathematics (210241)							
Companion Course: Laborato	Companion Course: Laboratory Practice VI (410255)						
Course Objectives:							
• To Understand Digital	Image Processing Concepts.						
To Study Various Meth	nods for Image Enhancement usi	ng Spatial and Frequency Domain.					
To Learn Classification	n Techniques for Image Segment	ation.					
To Understand Image	Compression and Object Recogn	ition.					
To Study Various Imag	ge Restoration Techniques.						
	Medical and Satellite Image Pro	cessing Applications.					
Course Outcomes:							
On completion of the course		D .					
	ematics Required for Digital Ima	0					
	equency Domain Method for Ima	-					
	proaches for Image segmentation						
	pt of Image Compression and Ob	oject Recognition.					
<b>CO5:</b> Explore the Image Re	_						
COO: Explore the Medical a	nd Satellite Image Processing A <sub>I</sub> Course Contents	optications.					
Unit I Intro	oduction to Digital Image Proc	essing 07 Hours					
Introduction, Fundamental sto	eps in Digital Image Processing	g, Components, Elements of visual					
		g and Quantization, Relationships					
	or Models, Image Types, Image	File Formats, Component Labeling					
algorithm.							
· · · · · · · · · · · · · · · · · · ·	Open and Display Images using						
#Exemplar/Case Studies	.jpg, .tiff, .bmp format and disp	nple image file, save the same in					
*Mapping of Course Outcomes for Unit I	CO1						
Unit II	Image Enhancement	08 Hours					
Domain Image Enhancem	ent: Intensity Transformations	bes of Image Enhancement- <b>Spatial</b> c, Contrast Stretching, Histogram s, Sharpening Filters, Gradient and					

Laplacian

Frequency Domain Image Enhancement: Low Pass filtering in Frequency Domain (Ideal,

Faculty of Engineering	Savitribai Phule Pune University
Butterworth, Gaussian), High	Pass filter in Frequency Domain (Ideal, Butterworth, Gaussian).
#Exemplar/Case	Write a program for image enhancement using suitable
Studies	algorithm for Histogram equalization, Local enhancement,
	Smoothing and Sharpening.
*Mapping of Course	CO2
<b>Outcomes for Unit II</b>	
Studies *Mapping of Course	algorithm forHistogram equalization, Local enhancement, Smoothing and Sharpening.

Unit III	Image Segmentation and Analysis	<b>08 Hours</b>
----------	---------------------------------	-----------------

Introduction to Image Segmentation and its need. **Classification of Image Segmentation Techniques:** Threshold Based Image Segmentation, Edge Based Segmentation, Edge Detection, Edge Linking, Hough Transform, Watershed Transform, Clustering Techniques, region approach

#Exemplar/Case Studies	Study the different image segmentation techniques for segmentation	image
*Mapping of Course Outcomes for Unit III	CO3	
Unit IV Imag	ge Compression and Object Recognition	<b>06 Hours</b>

**Image Compression:** Introduction to Image Compression and its need, Classification of Image Compression Techniques- run-length coding, Shannon Fano coding, Huffman coding, Scalar and vector quantization, Compression Standards-JPEG/MPEG, Video compression.

**Object Recognition:** Introduction, Computer Vision, Tensor Methods in Computer Vision, Classifications Methods and Algorithm, Object Detection and Tracking, Object Recognition.

#Exemplar/Case Studies	Explain image compression and object recognition techniques.
*Mapping of Course Outcomes for Unit IV	CO4

Unit V         Image Restoration and Reconstruction	07 Hours
---	----------

Introduction, Model of Image degradation, Noise Models, Classification of image restoration techniques, Blind-deconvolution techniques, Lucy Richardson Filtering, Wiener Filtering

#Exemplar/Case Studies	Explain classification of image restoration techniques.
*Mapping of Course Outcomes for Unit V	CO5

**Medical Image Processing:** Introduction, Medical Image Enhancement, Segmentation, MedicalImage Analysis (Images of Brain MRI or Cardiac MRI or Breast Cancer).

**Satellite Image Processing:** Concepts and Foundations of Remote Sensing, GPS, GIS, Elements of Photographic Systems, Basic Principles of Photogrammetry, Multispectral, Thermal, and Hyper spectral Sensing, Earth Resource Satellites Operating in the Optical Spectrum

#Exemplar/Case	Implement application for medical image processing or satellite
Studies	image processing using OpenCV or Python.

Fourth Year of Computer Engineering (2019 Course)											
Elective V											
410252(C): Software Defined Networks											
Teaching Scheme: TH: 3 Hours/Week		Credit 3	Examination Scheme: In-Sem (Paper):30 Marks End-Sem(Paper):70 Marks								
Prerequisites Courses: Computer Networks and Security(310244)											
Companion Course: La	aboratory Practi	ce VI(410255)									
<b>Course Objectives:</b>											
<ul> <li>To learn the fundamentals of software defined networks and understand Differentiation between traditional networks and software defined networks</li> <li>To gain conceptual understanding of Software Defined Networking (SDN) and its rolein Data Center.</li> </ul>											
• To study about the	ne SDN Program	nming.									
To study industri	al deployment	use-cases of SDN.									
• To study about the	ne various appli	cations of SDN									
To Describe SDN	N Framework.										
<b>Course Outcomes:</b>											
On completion of the c	ourse, student	will be able to–									
CO1: Interpret the n	eed of Software	e Defined networking so	lutions.								
CO2: Analyze differ	rent methodolog	gies for sustainable Soft	ware Defined Networkingsolutions.								
CO3: Select best pra	actices for desig	n, deploy and troublesh	oot of next generation networks.								
CO4: Develop prog	•										
		d SDN Controllers using	g Open Flow protocol								
CO6: Design and de	evelop various a										
		Course Contents									
Unit I	Introd	iction	07 Hours

#### Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) **Elective VI** 410253(D): Quantum Computing **Examination Scheme: Teaching Scheme:** Credit In-Sem (Paper): 30 Marks 03 **TH: 03 Hours/Week** End-Sem (Paper): 70 Marks Prerequisite Courses: Data Structures and Algorithms(210243), Data Science and Big Data Analytics (310251) **Companion Course**: Laboratory Practice IV(410247) **Course Objectives:** To provide introduction and necessary expertise to the learner in the upcoming discipline of Quantum • Computing and Machine Learning.

- To enable the students to learn Quantum Computing and Quantum Machine Learning in practical-oriented learning sessions so that he/she can independently use existing open-source Quantum Computing Hardware and Software Frameworks
- To teach the students to develop hybrid solutions by applying Quantum Machine Learning to potential business application areas.
- To study Quantum Information Theory and Quantum Computing Programming Model of Computation.
- To study Quantum Algorithms and apply these to develop hybrid solutions .
- To study Quantum Concepts necessary for understanding the Quantum Computing Paradigm and compare the available hardware and software infrastructure and frameworks made available open source by major players in the Industry and Academia.

### **Course Outcomes:**

On completion of the course, student will be able to-

- CO1: To understand the concepts of Quantum Computing
- CO2: To understand and get exposure to mathematical foundation and quantum mechanics
- CO3: To understand and implement building blocks of Quantum circuits
- CO4: To understand quantum information, its processing and Simulation tools
- CO5: To understand basic signal processing algorithms FT, DFT and FFT

CO6 : To study and solve examples of Quantum Fourier Transforms and their applications

## **Course Contents**

## Unit IIntroduction to Quantum Computing07 Hours

Fundamental Concepts of Quantum computing:

Introduction and Overview, Global Perspective, Quantum Bits, Quantum Computation, Quantum Algorithms, Quantum information and Quantum information processing,

\*Mapping of CourseOutcomes for CO1

### <u>Unit I</u>

01

**Unit II** 

Mathematical foundation of Quantum Computing 07 Hours

### Quantum Mechanics:

Linear Algebra and Quantum mechanics, Postulates of Quantum mechanics, state space, evolution, Quantum measurement, distinguishing quantum states, projective measurements, POVM measurements, Phase, Composite systems, Global view and applications, Density operator

Faculty of Engineering	Savitribai Phule	Pune University

Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) Elective IV 410253(E): Open Elective II									
Teaching Scheme:     Credit     Examination Scheme:									
TH: 03Hours/Week	03	In-Sem (Paper): 30 Marks End-Sem (Paper): 70 Marks							
Companion Course: Laboratory Practice VI (410255)									
The open elective included, so as to give the student a wide choice of subjects from other Engineering Programs. To inculcate the out of box thinking and to feed the inquisitive minds of the learners the idea of open elective is need of the time. Flexibility is extended with the choice of open elective allows the learner to choose interdisciplinary/exotic/future technology related courses to expand the knowledge horizons. With this idea learner opts for the course without any boundaries to choose the approved by academiccouncil and Board of Studies.									

## Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) 410255: Laboratory Practice V

Teaching Scheme: Practical: 2 Hours/Week	Credit 01	Examination Scheme Term Work: 50 Marks Practical: 50 Marks					
Companion Course: High Performance Computing(410250), Deep Learning(410251)							

### **Course Objectives:**

- To understand and implement searching and sorting algorithms.
- To learn the fundamentals of GPU Computing in the CUDA environment.
- To illustrate the concepts of Artificial Intelligence/Machine Learning(AI/ML).
- To understand Hardware acceleration.
- To implement different deep learning models.

### **Course Outcomes:**

**CO1: Analyze and measure** performance of sequential and parallel algorithms.

CO2: Design and Implement solutions for multicore/Distributed/parallel environment.

**CO3: Identify and apply** the suitable algorithms to solve AI/ML problems.

**CO4: Apply** the technique of Deep Neural network for implementing Linear regression and classification.

**CO5:** Apply the technique of Convolution (CNN) for implementing Deep Learning models. **CO6:** Design and develop Recurrent Neural Network (RNN) for prediction.

## **Guidelines for Instructor's Manual**

Laboratory Practice V is for practical hands on for core courses High Performance Computing and Data Learning. The instructor's manual is to be developed as a hands-on resource and as ready reference. The instructor's manual need to include prologue (about University/program/ institute/ department/foreword/ preface etc), University syllabus, conduction and Assessment guidelines, topics under consideration-concept, objectives, outcomes, set of typical applications/assignments/ guidelines, references among others.

## **Guidelines for Student's Laboratory Journal**

The laboratory assignments are to be submitted by student in the form of journal. Journal may

consists of prologue, Certificate, table of contents, and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, software and Hardware requirements, Date of Completion, Assessment grade/marks and assessor's sign, Theory- Concept in brief, Algorithm/Database design, test cases, conclusion/analysis). Program codes with sample output of all performed assignments are to be submitted as softcopy.

## **Guidelines for Laboratory /Term Work Assessment**

Continuous assessment of laboratory work is to be done based on overall performance and lab assignments performance of student. Each lab assignment assessment will assign grade/marks based on parameters with appropriate weightage. Suggested parameters for overall assessment as well as each lab assignment assessment include- timely completion, performance, innovation, efficient codes, punctuality and neatness reserving weightage for successful mini-project completion and related documentation.

## **Guidelines for Practical Examination**

- Both internal and external examiners should jointly frame suitable problem statements for practical examination based on the term work completed.
- During practical assessment, the expert evaluator should give the maximum weightage to the satisfactory implementation of the problem statement.
- The supplementary and relevant questions may be asked at the time of evaluation to test the student's for advanced learning, understanding of the fundamentals, effective and efficient implementation.
- Encouraging efforts, transparent evaluation and fair approach of the evaluator will not create any uncertainty or doubt in the minds of the students. So adhering to these principles will consummate our team efforts to the promising boost to the student's academics.

## **Guidelines for Laboratory Conduction**

- List of recommended programming assignments and sample mini-projects is provided for reference.
- Referring these, Course Teacher or Lab Instructor may frame the assignments/mini-project by understanding the prerequisites, technological aspects, utility and recent trends related to the respective courses.
- Preferably there should be multiple sets of assignments/mini-project and distribute among batches of students.
- Real world problems/application based assignments/mini-projects create interest among learners serving as foundation for future research or startup of business projects.
- Mini-project can be completed in group of 2 to 3 students.

Faculty of Engineering

- Software Engineering approach with proper documentation is to be strictly followed.
- Use of open source software is to be encouraged.
- Instructor may also set one assignment or mini-project that is suitable to respective course beyond the scope of syllabus.

Operating System recommended :- 64-bit Open source Linux or its derivative

Programming Languages: Object Oriented Languages

C++/JAVA/PYTHON/R

Programming tools recommended: Front End: Java/Perl/PHP/Python/Ruby/.net, Backend : MongoDB/MYSQL/Oracle, Database Connectivity : ODBC/JDBC

## Suggested List of Laboratory Experiments/Assignments

## 410250 : High Performance Computing

Any 4 Assignments and 1 Mini Project are Mandatory

### Group 1

1.	Design and implement Parallel Breadth First Search and Depth First Search based on existing algorithms using OpenMP. Use a Tree or an undirected graph for BFS and DFS.					
	argoritants using Openivit. Ose a free of an undirected graph for DFS and DFS.					
2.	Write a program to implement Parallel Bubble Sort and Merge sort using OpenMP. Use					
	existing algorithms and measure the performance of sequential and parallel algorithms.					
3.	Implement Min, Max, Sum and Average operations using Parallel Reduction.					
4.	Write a CUDA Program for :					
	1. Addition of two large vectors					
	2. Matrix Multiplication using CUDA C					
5.	Implement HPC application for AI/ML domain.					
Group 2						
6.	Mini Project: Evaluate performance enhancement of parallel Quicksort Algorithm using MPI					
7.	Mini Project: Implement Huffman Encoding on GPU					
8.	Mini Project: Implement Parallelization of Database Query optimization					
9.	Mini Project: Implement Non-Serial Polyadic Dynamic Programming with GPU Parallelization					
9.	Mini Project: Implement Non-Serial Polyadic Dynamic Programming with GPU Parallelization 410251 : Deep Learning					

Group 1

1.	Linear regression by using Deep Neural network: Implement Boston housing price								
	predictionproblem by Linear regression using Deep Neural network. Use Boston House price								
	predictiondataset.								
2.	Classification using Deep neural network (Any One from the following)								
	1. Multiclass classification using Deep Neural Networks: Example: Use the OCR letter								
	recognition dataset <u>https://archive.ics.uci.edu/ml/datasets/letter+recognition</u>								
	2. Binary classification using Deep Neural Networks Example: Classify movie reviews into								
	positive" reviews and "negative" reviews, just based on the text content of the reviews.								
	Use IMDB dataset								
3.	Convolutional neural network (CNN) (Any One from the following)								
	• Use any dataset of plant disease and design a plant disease detection system using CNN.								
	• Use MNIST Fashion Dataset and create a classifier to classify fashion clothing into categories.								
4.	Recurrent neural network (RNN) Use the Google stock prices dataset and design a time								
	series analysis and prediction system using RNN.								
Group	2								
5.	Mini Project: Human Face Recognition								
6.	<b>Mini Project:</b> Gender and Age Detection: predict if a person is a male or female and also their age								
7.	Mini Project: Colorizing Old B&W Images: color old black and white images to colorful images								

<u>@The CO-PO Mapping Matrix</u>

# Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) 410256: Laboratory Practice VI

<b>Teaching Scheme:</b>	Credit	
<b>Practical: 2 Hours/Week</b>	01	

**Examination Scheme :** Term Work: 50 Marks

Companion Course: Elective V (410252), Elective VI( 410253)

## **Course Objectives:**

- To understand the fundamental concepts and techniques of natural language processing (NLP)
- To understand Digital Image Processing Concepts
- To learn the fundamentals of software defined networks
- Explore the knowledge of adaptive filtering and Multi-rate DSP
- To be familiar with the various application areas of soft computing.
- To introduce the concepts and components of Business Intelligence (BI)
- To study Quantum Algorithms and apply these to develop hybrid solutions

## **Course Outcomes:**

On completion of this course, the students will be able to

CO1: Apply basic principles of elective subjects to problem solving and modeling.

CO2: Use tools and techniques in the area of software development to build mini projects

CO3: Design and develop applications on subjects of their choice.

CO4: Generate and manage deployment, administration & security.

## Guidelines for Instructor's Manual

List of recommended programming assignments and sample mini-projects is provided for reference. Referring to these, Course Teacher or Lab Instructor may frame the assignments/mini-project by understanding the prerequisites, technological aspects, utility and recent trends related to the respective courses. Preferably there should be multiple sets of assignments/mini-project and distributed among batches of students. Real world problems/application based assignments/mini-projects create interest among learners serving as foundation for future research or startup of business projects. Mini-project can be completed in group of 2 to 3 students. Software Engineering approach with proper documentation is to be strictly followed. Use of open source software is to be encouraged. Instructor may also set one assignment or mini-project that is suitable to the respective course beyond the scope of syllabus.

**Operating System recommended**: - 64-bit Open source Linux or its derivative **Programming** Languages: C++/JAVA/PYTHON/R

**Programming tools recommended**: Front End: Java/Perl/PHP/Python/Ruby/.net, **Backend**: MongoDB/MYSQL/Oracle, Database Connectivity: ODBC/JDBC, **Additional Tools**: Octave, Matlab, WEKA,powerBI

## Guidelines for Student's Laboratory Journal

The laboratory assignments are to be submitted by students in the form of a journal. Journal may consists of prologue, Certificate, table of contents, and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, software and Hardware requirements, Date of Completion, Assessment grade/marks and assessor's sign, Theory- Concept in brief, Algorithm/Database design, test cases, conclusion/analysis). Program codes with sample output of all performed assignments are to be submitted as softcopy.

As a conscious effort and little contribution towards Green IT and environment awareness, attaching printed papers as part of write-ups and program listing to journal may be avoided. Use of digital storage media/DVD containing students programs maintained by lab In-charge is highly encouraged. For reference one or two journals may be maintained with program prints at Laboratory.

# Guidelines for Laboratory /Term Work Assessment

Continuous assessment of laboratory work is to be done based on overall performance and lab Home Faculty of Engineering Savitribai Phule Pune University

Syllabus for Fourth Year of Computer Engineering assignments performance of student. Each lab assignment assessment will assign grade/marks based on parameters with appropriate weightage. Suggested parameters for overall assessment as well as each lab assignment assessment include- timely completion, performance, innovation, efficient codes, punctuality and neatness reserving weightage for successful mini-project completion and related documentation.

# **Guidelines for Practical Examination**

It is recommended to conduct examination based on Mini-Project(s) Demonstration and related skill learned. Team of 2 to 3 students may work on mini-project. During the assessment, the expert evaluator should give the maximum weightage to the satisfactory implementation and software engineering approach followed. The supplementary and relevant questions may be asked at the time of evaluation to test the student"s for advanced learning, understanding, effective and efficient implementation and demonstration skills. Encouraging efforts, transparent evaluation and fair approach of the evaluator will not create any uncertainty or doubt in the minds of the students. So adhering to these principles will consummate our team efforts to the promising start of the student's academics.

# Guidelines for Laboratory Conduction

The instructor's manual is to be developed as a hands-on resource and as ready reference. The instructor's manual need to include prologue (about University/program/ institute/ department/foreword/ preface etc), University syllabus, conduction and Assessment guidelines, topics under consideration-concept, objectives, outcomes, set of typical applications/assignments/ guidelines, references among others.

Recommended / Sample set of assignments and mini projects for reference for four courses offered for Elective III and for four courses offered for Elective IV. Respective Student has to complete laboratory work for elective III and IV that he/she has opted.

# 410252(A): Natural Language Processing

Any 5 Assignments and 1 Mini Project are mandatory

Syllabus for Fourth Year of Computer Engineering

Group 1						
1.	Perform tokenization (Whitespace, Punctuation-based, Treebank, Tweet, MWE) using NLTK library. Use porter stemmer and snowball stemmer for stemming. Use any technique for lemmatization. Input / Dataset –use any sample sentence					
2	Perform bag-of-words approach (count occurrence, normalized count occurrence), TF-IDF on data. Create embeddings using Word2Vec. <b>Dataset to be used:</b> <u>https://www.kaggle.com/datasets/CooperUnion/cardataset</u>					
3	Perform text cleaning, perform lemmatization (any method), remove stop words (any method), label encoding. Create representations using TF-IDF. Save outputs. Dataset: https://github.com/PICT-NLP/BE-NLP-Elective/blob/main/3- Preprocessing/News_dataset.pickle					
4	Create a transformer from scratch using the Pytorch library					
5	Morphology is the study of the way words are built up from smaller meaning bearing units. Study and understand the concepts of morphology by the use of add delete table					
Group 2						
6	<ul> <li>Mini Project (Fine tune transformers on your preferred task)</li> <li>Finetune a pretrained transformer for any of the following tasks on any relevant dataset of your choice:         <ul> <li>Neural Machine Translation</li> <li>Classification</li> <li>Summarization</li> </ul> </li> </ul>					
7	Mini Project - POS Taggers For Indian Languages					
8	Mini Project -Feature Extraction using seven moment variants					
9	9 Mini Project -Feature Extraction using Zernike Moments					
Virual La	b: <u>https://nlp-iiith.vlabs.ac.in/</u>					
410252(H	3) Image Processing					
Any 5 As	signments and 1 Mini Project are mandatory					
Group 1						
Program	nming language: Python/C/C++ using OpenCV					

Faculty of Engineering

#### Savitribai Phule Pune University

1.	Consider any image with size 1024*1024. Modify the image to the sizes 512*512, 256*256, 128*128, 64*64 and 32*32 using subsampling technique. Create the original image from all the above subsampled images using resampling technique. Read any image. Display the histogram, Equalized histogram, and image with equalized histogram
2	Consider any image with size 1024*1024. Modify the image to the sizes 512*512, 256*256, 128*128, 64*64 and 32*32 using subsampling technique. Create the original image from all the above subsampled images using resampling technique.
3	Read any image. Display the histogram, Equalized histogram, and image with equalized histogram
4	Read any image. Display the outputs of contrast stretching, intensity level slicing
5	Compare the results of any three edge detection algorithms on the same image dataset and do the analysis of the result.
6	Compare the result of any two image segmentation algorithm on the same image data set
7	Write a program for image compression using any three compression techniques and compare the results.
Group 2	
8	Mini project: Implement visual surveillance applications and detect moving objects using object detection and tracking algorithm Or
	Implement any medical image processing application for freely available medical image dataset.
9	Mini Project - Implement image segmentation to detect object in the background of image.
	410252(C) : Software Defined Networks
Any 5 As	ssignments and 1 Mini Project are mandatory
Group 1	
1.	Prepare setup for Mininet network emulation environment with the help of Virtual box and Mininet. Demonstrate the basic commands in Mininet and emulate different custom network topology(Simple, Linear, and Tree).View flow tables.
2	After studying open source POX and Floodlight controller, Install controller and run custom topology using remote controller like POX and floodlight controller. Recognize inserted flows by controllers.
3	Create a SDN environment on Mininet and configure a switch to provide a firewall functionality using POX controller. Ref: https://github.com/mininet/openflow-tutorial/wiki/Create- Firewall

•

1	Faculty of Engineering Savitribai Phule Pune University
4	Using Mininet as an Emulator and POX controller, build your own internet router. Write simple outer with a static routing table. The router will receive raw Ethernet frames and process the packet forwarding them to correct outgoing interface. You must check the Ethernet frames are received and the forwarding logic is created so packets go to the correct interface. Ref: https://github.com/mininet/mininet/wiki/SimpleRouter
	Ker. https://github.com/inininet/inininet/wiki/SimpleKouter
5	Emulate and manage a Data Center via a Cloud Network Controller: create a multi-rooted tree-like (Clos) topology in Mininet to emulate a data center. Implement specific SDN applications on top of the network controller in order to orchestrate multiple network tenants within a data center environment, in the context of network virtualization and management. Ref:https://opencourses.uoc.gr/courses/pluginfile.php/13576/mod_resource/content/2/exercise 5.pdf
6	Study Experiment: Study in details Cloud seeds automates IAAS using SDN and a high- performance network from Juniper SDN Framework.
	410252(D) : Advanced Digital Signal Processing
Any 5 A	ssignments and 1 Mini Project are mandatory
Group 1	
purpose. B] C++ o	LAB or other equivalent software working with speech and image signals/files and for analysis or JAVA for working with sampled data (n – point data samples of DT/Digital signal) A or other for image processing assignments
1.	Apply 1-D DFT to observe spectral leakage and frequency analysis of different window sequences, plot the frequency spectrums.
2.	Adaptive FIR and IIR filter design: A] Steepest descent and Newton method, LMS method, B] Adaptive IIR Filter design: Pade Approximation, Least square design
3.	Power spectrum estimation and analysis: Take a speech signal and perform A] Non parametric method: DFT and window sequences B] Parametric methods: AR model parameters
4.	Multi-rate DSP and applications – Decimation, Interpolation, sampling rate conversion A] Take a speech signal with specified sampling frequency. Decimate by factor D(e.g. factor B] Take a speech signal with specified sampling frequency. Interpolate by factor I(e.g. factor) C] Sampling rate conversion by factor of I/D
5.	Write a program to calculate LPC coefficients, reflection coefficients using Levinson Durbin algorithm

.

ı	Faculty of Engineering         Savitribai Phule Pune University					
6.	Feature Extraction of speech signal					
	A] Using LPC and other methods					
	B] Apply different coding methods: harmonic coding, vector quantization					
Group 2						
7	Mini-Project : Discrete Cosine Transform (DCT)					
/	A] To find DCT of NxN image block					
	B] To plot spectrum of the speech signal using DCT and find the correlation of DCT					
transformed signal						
C] Image filtering using DCT : LPF, edge detection						
	D] Image compression using DCT, Image resizing					
	OR District Lands					
	Mini-Project : Image Processing					
	A] Histogram and Equalization					
	B] Image Enhancement Techniques					
	C] Image Filtering: LPF, HPF, Sobel/Prewitt Masks					
	D] Image Smoothing with special filters: Median, Weiner, Homomorphic filters					
	410252(E) : Open Elective					
1.	Suitable set of programming assignments/Mini-projects for open elective Opted.					
	PART II 410253 : Elective VI					
410253	(A) Pattern Recognition					
Any 5 As	ssignments and 1 Mini Project are mandatory					
Group 1						
1	Extraction of features using structural and feature space methods for Indian Fruits					
2	Face Recognition using PCA and multiclass LDA.					
3	Fruit shape recognition using Eigen Faces and Fisher Faces					
4	Perform sentiment analysis on the IMDB movie reviews dataset					
5	Perform a classification task on a dataset of modulated radio signals.					
6	Perform image segmentation on the Berkley Segmentation dataset					
Group 2						
6	<b>Mini Project</b> - Real-time face detection in multi-scale images with an attentional cascade of boosted classifiers.					

.

## 7 **Mini Project** - Printed Devanagari Text Recognition using structural approach.

# 410253(B) : Soft Computing

Any 5 Assignments and 1 Mini Project are mandatory

# **Group 1** 1 Design an X-OR Gate with feed-forward neural network (also popularly known as a Multilayer Perceptron) classifier. 2 Symmetric and Asymmetric implementation of Particle Swarm Optimization for Traveling Salesman Problem. 3 Implement Union, Intersection, Complement and Difference operations on fuzzy sets. Also create fuzzy relation by Cartesian product of any two fuzzy sets and perform max-min composition on any two fuzzy relations. 4 Implement Union, Intersection, Complement and Difference operations on fuzzy sets. Also create fuzzy relation by Cartesian product of any two fuzzy sets and perform max-min composition on any two fuzzy relations. 5 Implement genetic algorithm for benchmark function (eg. Square, Rosenbrock function etc) Initialize the population from the Standard Normal Distribution. Evaluate the fitness of all its individuals. Then you will do multiple generation of a genetic algorithm. A generation consists of applying selection, crossover, mutation, and replacement. Use: • Tournament selection without replacement with tournament size s • One point crossover with probability Pc • bit-flip mutation with probability Pm • use full replacement strategy Group 2 6 Mini Project - Create a small hybrid system for solving a chosen problem by following the given steps below. 1. Explain on one page the main characteristics of hybrid systems. 2. For the task chosen from the list below, create a multimodular block diagram of a possible solution to the problem. 3. Choose appropriate techniques for solving each sub problem represented as a module. What alternatives are there for each of them? 4. Create subsystems for solving each of the sub problems. Compile the whole hybrid system. 5. Make experiments with the hybrid system and validate the results.

Mini Project: Handwritten digits recognition
Mini Project: Bank loan approval decision-making system
Mini Project: Stock market prediction
Mini Project: Unemployment prediction
Mini Project: Spoken words recognition, for example, "on"/"off"; "yes"/"no"; "stop"/ "go."
Mini Project: Loan approval

# **410253(C) : Business Intelligence**

Any 5 Assignments and 1 Mini Project are madatory

Group	1				
1	Import the legacy data from different sources such as (Excel, Sql Server, Oracle etc.) and load in the target system. (You can download sample database such as Adventure works, Northwind, foodmart etc.)				
2	Perform the Extraction Transformation and Loading (ETL) process to construct the database in the Sql server.				
3	Create the cube with suitable dimension and fact tables based on ROLAP, MOLAP and HOLAP model.				
4	Import the data warehouse data in Microsoft Excel and create the Pivot table and Pivot Chart				
5	Perform the data classification using classification algorithm. Or Perform the data clustering using clustering algorithm.				
Group	2				
6	<ul><li>Mini Project: Each group of 4 Students (max) assigned one case study for this;</li><li>A BI report must be prepared outlining the following steps:</li><li>a) Problem definition, identifying which data mining task is needed.</li><li>b) Identify and use a standard data mining dataset available for the problem.</li></ul>				
	410253(D) :Quantum Computing				
Any 4 As	signments and 1 Mini Project are mandatory				
Group	Group 1				
1	Analyze simple states of superposition and the effect of doing the measurement in different basis states .				
2	Build simple quantum circuits with single and two-qubit gates				
3	Install Setup for running quantum programs on IBM machines.				

	Faculty of Engineering     Savitribai Phule Pune University								ersity			
4	Analyz	Analyze the effectiveness of simple error correction scheme										
5	Impler	Implement quantum programs in NISQ model of computing										
6	6 Make a script for visualizing the energy levels of Hamiltonians.											
Group 2												
6	Mini Project: Build a Quantum Random Number Generator.											
7	Mini Project: Implement Grover's Search Algorithm.											
7	Mini Project: Use Shor's Algorithm to Factor a Number.											
	410253(E) : Open Elective											
1.	Suitable set of programming assignments/Mini-projects for open elective Opted.

# Fourth Year of Computer Engineering (2019 Course) 410256: Project Work Stage II

	10250: Project work Stage	; 11
Teaching Scheme: TH: 06 Hours/Week	Credit 06	Examination Scheme: Term work: 100 Marks Presentation: 50Marks
Prerequisite Courses: Proje	ct Stage I(410248)	
Course Objectives:		
• To follow SDLC meti	culously and meet the objectives of p	proposed work
<b>e .</b>	ore deployment of system	
• To validate the work u		
• To consolidate the wo	rk as furnished report	
Course Outcomes:		
On completion of the course,	student will be able to-	
CO1: Show evidence	of independent investigation	
CO2: Critically analy	ze the results and their interpretation	1.
CO3: Report and pre	sent the original results in an orderly	way and placing the open
questions in the righ	tperspective.	
CO4: Link technique	s and results from literature as well a	as actual research and future
research lines with the	research.	
CO5: Appreciate prac	ctical implications and constraints of	the specialist subject
	Guidelines	
Selection of Technology performance discussions usi	and Tools, Installations, UML ng data tables per parameter co	ining project work which consists of implementations, testing, Results, onsidered for the improvement with sis and validation of results and

conclusions. The student shall prepare and submit the report of Project work in standard format for satisfactory completion of the work that is the duly certified by the concerned guide and head of the Department/Institute

Follow guidelines and formats as mentioned in Project Workbook recommended by Board of Studies

# Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) 410257: Audit Course 8

In addition to credits, it is recommended that there should be audit course, in preferably in each semester starting from second year in order to supplement students' knowledge and skills. Student will be awarded the bachelor's degree if he/she earns specified total credit [1] and clears all the audit courses specified in the curriculum. The student will be awarded grade as AP on successful completion of audit course. The student may opt for one of the audit courses per semester, starting in second year first semester. Though not mandatory, such a selection of the audit courses helps the learner to explore the subject of interest in greater detail resulting in achieving the very objective of audit course's inclusion. List of options offered is provided. Each student has to choose one audit course from the list per semester. Evaluation of audit courses are suggested.

### Criteria

The student registered for audit course shall be awarded the grade AP (Audit Course Pass) and shall be included such AP grade in the Semester grade report for that course, provided student has the minimum attendance as prescribed by the Savitribai Phule Pune University and satisfactory performance and secured a passing grade in that audit course. No grade points are associated with this 'AP' grade and performance in these courses is not accounted in the calculation of the performance indices SGPA and CGPA. Evaluation of audit course will be done at Institute level itself [1]

# Savitribai Phule Pune University, Pune Fourth Year of Computer Engineering (2019 Course) 410257: Audit Course 8 AC8 – I: Usability Engineering

In this course you will have a hands-on experience with usability evaluation and user-centered design. This course will not help to learn how to implement user interfaces, but rather how to design based on the needs of users, which you will determine, and learn how to evaluate your designs rigorously. This help in knowing more about the usability; human computer interaction, the

psychological aspects of computing, evaluation.

## **Course Objectives:**

- To understand the human centered design process and usability engineering process andtheir roles in system design and development.
- To know usability design guidelines, their foundations, assumptions, advantages, and weaknesses
- Understand the user interface based on analysis of human needs and prepare a prototype system

### **Course Outcome:**

On completion of the course, learner will be able to-

CO1: Describe the human centered design process and usability engineering process and theirroles in system design and development.

CO2: Discuss usability design guidelines, their foundations, assumptions, advantages, andweaknesses.

CO3: Design a user interface based on analysis of human needs and prepare a prototype system. CO4: Assess user interfaces using different usability engineering techniques.

CO5: Present the design decisions

## **Course Contents:**

**1.** What Is Usability?: Usability and Other Considerations, Definition of Usability, Example: Measuring the Usability of Icons, Usability Trade-Offs, Categories of Users and Individual User Differences

- **2.** Usability in Software Development : The Emergence of Usability, Human ComputerInteraction, Usability Engineering
- 3. The usability Engineering Lifecycle: Requirement Analysis, Design, Testing, Development
- 4. Usability Assessment Methods beyond Testing
- **5.** International User Interfaces

### **Books:**

- **1.** Mary Beth Rosson, John Millar Carroll, "Usability Engineering: Scenario- based Development of Human- Computer Interaction"
- 2. Jakob Nielsen, "Usability Engineering"
- 1. Deborah J. Mayhew, "The usability engineering lifecycle"

# Savitribai Phule Pune University, Pune Fourth Year of Computer Engineering (2019 Course) 410257: Audit Course 8 AC8 – II: Conversational Interfaces

Effective information security at the enterprise level requires participation, planning, and practice. It is an ongoing effort that requires management and staff to work together from the same script. Fortunately, the information security community has developed a variety of resources, methods, and best practices to help modern enterprises address the challenge. Unfortunately, employing these tools demands a high degree of commitment, understanding, and skill attributes that must be sustained through constant awareness and training.

**Course Objectives:** 

- To understand the basics of conversation
- To know the interactive environments for conversational skills
- To acquaint with the speech to text and text to speech techniques

## **Course Outcome:**

On completion of the course, learner will be able to-

CO1: Develop an effective interface for conversation

CO2: Explore advanced concepts in user interface

**Course Contents:** 

- **1. Introduction to Conversational Interface:** Preliminaries, Developing a speech based Conversational Interface, Conversational Interface and devices.
- **2.** A technology of Conversation: Introduction, Conversation as Action, The structure of Conversation, The language of Conversation.

**3. Developing a Speech-Based Conversational Interface:** Implementing Text to Speech: Text Analysis, Wave Synthesis, Implementing Speech Recognition: Language Model, Acoustic Model, Decoding. Speech Synthesis Markup Language.

## 4. Advanced voice user interface design

Books:

- 1. Cathy Pearl, "Designing Voice User Interfaces: Principles of Conversational Experiences"
- 2. Michael McTear, ZoraidaCallejas, David Griol, "The Conversational Interface: Talking to Smart Devices"
- 3. Martin Mitrevski, "Developing Conversational Interfaces for iOS: Add Responsive Voice Control"
- 4. SriniJanarthanam, "Hands-On Chatbots and Conversational UI Development: Build chatbots"

# Savitribai Phule Pune University, Pune Fourth Year of Computer Engineering(2019Course) 410257:Audit Course8 AC8–III: Social Media And Analytics

This course aims to create awareness among the students regarding social media and analytics.

### **Course Objectives:**

- Get strategic understanding of Digital Marketing and Social Media Marketing.
- Understand how to use it for branding and sales.
- Understand its advantages& limitations.
- Become familiar with Best Practices, Tools & Technologies.
- Blend digital and social marketing with offline marketing.
- Plan and manage digital marketing budget.
- Manage Reporting & Tracking Metrics.
- Understand the future of Digital Marketing and prepare for it.

### **Course Outcome:**

On completion of the course, learner will be able to-

CO1: Develop a far deeper understanding of the changing digital land scape.

CO2: Identify some of the latest digital marketing trends and skill sets needed for today's marketer.

CO3: Successful planning, prediction, and management of digital marketing campaigns

CO4: Assessuserinterfacesusingdifferentusabilityengineeringtechniques.

CO5: Implement smart management of different digital assets for marketing needs.

CO6: Assess digital marketing as a long term career opportunity.

#### **Course Contents:**

- 1. Digital Marketing, History of Digital Marketing, Importance of Digital Marketing, Effective use of Digital Marketing, Effects of wrong Digital Marketing, Digital Marketing to develop brands, Digital Marketing for sales, Digital Marketing for product and service development.
- 2. Techniques for effective Email Marketing and pitfalls, Various online email marketing platforms such as Campaign Monitor and Mail Chimp, Web content, web usability, navigation and design, Bookmarking and News Aggregators, Really Simple Syndication (RSS),Blogging, Live Chat, User Generated Content (Wikipedia etc),Multi-media Video (Video Streaming, YouTube etc),Multi-media Audio & Podcasting (iTunes etc),Multi-media Photos/Images (Flickr etc),Google Alerts and Giga Alert (Brand, product and service monitoring online),Crowd sourcing,Virtual Worlds.

3. Search Engine Optimization (SEO), Search Engine Optimization (SEO) tips and techniques, Google Adwords, Google various applications such as 'Google Analytics', Maps, Places etc to enhance a brand's products, services and operations.

4.Facebook & LinkedIn and other Social Media for areal marketing, Utilizing Facebook and LinkedIn's Advertising functionality and Applications, Brand reputation management techniques, Systems for 'buzzmonitoring'forbrands, products and services, Effective Public Relations (PR) online and business development.

# Savitribai Phule Pune University Fourth Year of Computer Engineering (2019 Course) 410257: Audit Course 8 AC8 – IV: MOOC-learn New Skill

This course aims to create awareness among the students regarding various courses available under MOOC and learn new skills through these courses.

**Course Objectives:** 

- To promote interactive user forums to support community interactions among students, professors, and experts
- To promote learn additional skills anytime and anywhere
- To enhance teaching and learning on campus and online

### **Course Outcomes:**

On completion of the course, , students will be able to

CO1: To acquire additional knowledge and skill.

### About Course

MOOCs (Massive Open Online Courses) provide affordable and flexible way to learn new skills, pursue lifelong interests and deliver quality educational experiences at scale. Whether you'reinterested in learning for yourself, advancing your career or leveraging online courses to educate your workforce, SWYAM, NPTEL, edx or similar ones can help. World's largest SWAYAM MOOCs, a new paradigm of education for anyone, anywhere, anytime, as per your convenience, aimed to provide digital education free of cost and to facilitate hosting of all the interactive courses prepared by the best more than 1000 specially chosen faculty and teachers in the country. SWAYAM MOOCs enhances active learning for improving lifelong learning skills by providing easy access to global resources.

SWAYAM is a programme initiated by Government of India and designed to achieve the three cardinal principles of Education Policy viz., access, equity and quality. The objective of this effortis to take the best teaching learning resources to all, including the most disadvantaged. SWAYAM seeks to bridge the digital divide for students who have hitherto remained untouched by the digital revolution and have not been able to join the mainstream of the knowledge economy. This is done through an indigenous developed IT platform that facilitates hosting of all the courses, taught in classrooms from 9th class till post-graduation to be accessed by anyone, anywhere at any time. All the courses are interactive, prepared by the best teachers in the country and are available, free of cost to the residents in India. More than 1,000 specially chosen faculty and teachers from across the Country have participated in preparing these courses.

The courses hosted on SWAYAM is generally in 4 quadrants – (1) video lecture, (2) specially prepared reading material that can be downloaded/printed (3) self-assessment tests through tests and quizzes and (4) an online discussion forum for clearing the doubts. Steps have been taken to enrich the learning experience by using audio-video and multi-media and state of the art pedagogy / technology. In order to ensure best quality content are produced and delivered, seven National Coordinators have been appointed: They are <u>NPTEL</u> for engineering and <u>UGC</u> for post-graduation education.

### **Guidelines:**

Instructors are requested to promote students to opt for courses (not opted earlier) with proper mentoring. The departments will take care of providing necessary infrastructural and facilities for the learners.

# Savitribai Phule Pune University, Pune Fourth Year of Computer Engineering (2019 Course) 410249: Audit Course 8 AC8 – V: Emotional Intelligence

This Emotional Intelligence (EI) training course will focus on the five core competencies of emotional intelligence: self-awareness, self-regulation, motivation, empathy and interpersonal skills. Participants will learn to develop and implement these to enhance their relationships in work and life by increasing their understanding of social and emotional behaviors, and learning how to adapt and manage their responses to particular situations. Various models of emotional intelligence

## will be covered.

## **Course Objectives:**

- To develop an awareness of EI models
- To recognize the benefits of EI
- To understand how you use emotion to facilitate thought and behavior
- To know and utilize the difference between reaction and considered response

## **Course Outcomes:**

On completion of the course, learner will be able to-

- CO1: Expand your knowledge of emotional patterns in yourself and others
- CO2: Discover how you can manage your emotions, and positively influence yourself and others
- CO3: Build more effective relationships with people at work and at home
- CO4: Positively influence and motivate colleagues, team members, managers
- CO5: Increase the leadership effectiveness by creating an atmosphere that engages others

## **Course Contents**

- **1. Introduction to Emotional Intelligence (EI) :** Emotional Intelligence and various EI models, The EQ competencies of self-awareness, self-regulation, motivation, empathy, and interpersonal skills, Understand EQ and its importance in life and the workplace
- 2. Know and manage your emotions: emotions, The different levels of emotional awareness, Increase your emotional knowledge of yourself, Recognize "negative" and "positive" emotions. The relationship between emotions, thought and behavior, Discover the importance of values, The impact of not managing and processing "negative" emotions, Techniques to manage your emotions in challenging situations
- **3.** Recognize emotions in others :The universality of emotional expression, Learn tools to enhance your ability to recognize and appropriately respond to others' emotions, Perceiving emotions accurately in others to build empathy
- **4. Relate to others**: Applying EI in the workplace, the role of empathy and trust in relationships, Increase your ability to create effective working relationships with others (peers, subordinates, managers, clients, Find out how to deal with conflict, Tools to lead, motivate others and create a high performing team.

### **Books:**

- 2. Steven Stein, "The EQ Edge", Jossey-Bass, ISBN : 978-0-470-68161-9
- 3. Drew Bird, "The Leader"s Guide to Emotional Intelligence", ISBN: 9781535176002

# **Acknowledgement**

It is with great pleasure and honor that I share the curriculum for Fourth Year of Computer Engineering ( $\overline{2019}$  Course) on behalf of Board of Studies (BoS), Computer Engineering. We, members of BoS are giving our best to streamline the processes and curricula design at both UG and PG programs.

It is always the strenuous task to balance the curriculum with the blend of core courses, current developments and courses to understand social and human values. By considering all the aspects with adequate prudence the contents are designed satisfying most of the necessities as per AICTE guidelines and to make the graduate competent enough as far as employability is concerned. I sincerely thank all the minds and hands who work adroitly to materialize these tasks. I really appreciate everyone's contribution and suggestions in finalizing the contents.

Success is sweet. But it's sweeter when it's achieved thorough co-ordination, cooperation and collaboration. I am overwhelmed and I feel very fortunate to be working with such a fabulous team- the Members of Board of Studies, Computer Engineering!

Even in these anxious situation, during the time of this unfortunate pandemic, each and every person, including the course coordinators and their team members, have worked seamlessly to come up with this all-inclusive curriculum for Fourth Year of Computer Engineering.

Thank you to all of you for delivering such great teamwork. I don't think it would have been possible to achieve the goal without each and every one of your efforts! I would like to express my deep gratitude to Dr. Pramod D. Patil (Dr. D. Y. Patil Institute of Technology, Pimpri), member BoS, Computer Engineering, for coordinating the complete activity and getting it to completion in a smooth manner.

I deeply appreciate and thank the managements of various colleges affiliated to SPPU for helping us in this work. These colleges have helped us by arranging sessions for preliminary discussion in the initial stage and at the same time in conducting Faculty Development Programs for various courses of the revised curriculum. All your support is warmly appreciated.

I sincerely appreciate, the hard work put in by the course coordinators and their team members, without your intellectual work and creative mind, and it would have not been possible to complete this draft. You have been a valuable member of our team!

Special thanks are due to Dr. Santosh Kumar Chobe, Dr. Jyoti Rao, Dr. Swati Nikam, Dr. C. R. Jadhav, Dr. S. S. Das, Dr. Rachna Somkunwar, Prof. Rajesh D. Bharati, Prof. Rupesh Mahajan, Prof. Yogesh S. Sapnar for helping with the formatting and crisp presentation of this draft. I would like to thank you from the core of my heart. Thank you for always being your best selves and contributing to the work.

I am thankful to Prof.Yogesh Shivaji Sapnar SCTR's Pune Institute of Computer Technology, Pune for the time he has spent in critically reading the draft and giving the final touches. I appreciate his initiative and thank him for his time, patience and hard work!

Thank you all, for not only your good work but also for all the support you have given each other throughout the drafting process, that's what makes the team stronger! You took the meaning of teamwork to a whole new level. Thank you for all your efforts!

Professor (Mrs.) Dr. Varsha H. Patil, Chairman, and Members- Dr. Shirish Sane, Dr. Sunil Bhirud, Dr. Manik Dhore, Dr. Pramod Patil, Dr. Girish Khilari, Dr. Sachin Lodha, Dr. Parikshit Mahalle, Dr. Venkatesharan, Dr. Geetanjali Kale, Dr. Suhasini Itkar, Dr. R. V. Patil , Dr. P. M. Yawalkar, and Dr. Swati A. Bhavsar.
