

SANDIP FOUNDATION

SIEM

**Sandip Institute of Engineering &
Management (SIEM) College Code - 5331**

Department of Electronics & Telecommunication

Event Title: Three days Training Program on LabVIEW Software (level 1).

Event Date: 27th January 2023 to 29th January 2023

Event Conduction Duration : 15 hrs

Event Venue:- Online Mode

Participants : 18

Name of Resource Person:

Prof. P. S. Aswale, Assistant Professor, E & TC, SIEM, Nashik

Objectives:

- Introduce the foundations of virtual instrumentation and graphical programming with LabVIEW. Design, implement, and distribute stand-alone applications using LabVIEW
- Create user interfaces with charts, graphs, and buttons
- Become familiar with LabVIEW to build basic applications

Hands-on experience with the software was provided in the following areas:

- A concise summary of LabVIEW and its applications
- Operations using math functions
- Numerous examples of loops (for, while)
- Digital Logic Design using Boolean gates
- Shift Registers and its applications
- Design of Arrays with examples
- Practical system examples using Case Structures, Flat Sequence, Event Structure
- Hierarchical designing using Sub-VI

Outcome:

1. Use LabVIEW to create basic applications.
2. Understand front panels, block diagrams, and icons and connector panes.
3. Use built-in LabVIEW functions.
4. Create complete LabVIEW applications with interactive Express VIs and I/O assistants.

Pramod Aswale is presenting

Dataflow Programming - Going with the flow

- Stated simply, a node executes only when data arrives at all its input terminals;
- the nodes supplies data to all of its output terminals when it finishes executing;
- and the data pass immediately from source to destination terminals.
