**Sandip Institute of Engineering &
Management (SIEM) College Code - 5331**

Department of Electronics & Telecommunication

Event Title: One Week FDP on Recent Trends in Antennas for Multifield Application.

Event Date: 28th Feb to 4th March 2023

Event Conduction Duration: 10.00 am – 3.00 pm daily

Event Venue: - Online

Participants: - Students & faculty all over Maharashtra

Objectives: The objective of this FDP is to introduce the fundamental principles of antenna and to apply them to the design and analysis of antenna systems

Outcome: The main objective of this workshop is to give exposure to students and researcher faculties on various types of Antennas and Antenna design software HFSS. It is conducted by the department of E&TC from 28 Feb to 4 March. Around 30 students and 25 faculty members have been participated in this workshop. The workshop has given a good insight about basic parameters of antenna, types of antennas and software tool HFSS. All the resource persons explain theory about antennas and demonstrated “how to design a microstrip antenna using HFSS” and hands-on session was conducted in the Ansys Software. Students learned to design and simulate a micro strip antenna model and observe results. This workshop also triggered students to do projects in this domain. It is helpful for the faculty who are pursuing research in antennas.

RF Interference Simulation Tool that solves

- Complex scenarios with multiple RF systems operating simultaneously.
- Includes all system-level interactions needed to identify interference problems.
- Non-linear models for intermodulation products.
- Provides the complete simulation framework for RF scenario level modeling to predict and mitigate complex RFI effects.

Applications

- RF system design and integration
- Platform-level cosite interference
- Wireless/RF coexistence
- EMI/EMC
- Automotive
- Aerospace
- Space/Satellite
- Medical electronics
- Wireless devices
- Communication sites
- Electronic Warfare

ABOUT COLLEGE

Sandip Foundation was established with the core objective of rendering selfless dedicated service to higher education in the fields of Engineering, Science, Arts, Management Studies, Polytechnic and Pharmacy. The Visionaries of Sandip Foundation have been involved in the field of higher education since the last fifteen years. Sandip Foundation (SIEM) is affiliated with All India Council of Technical education and to the Pune University. In its short span of existence, it has created a name for itself through its honest effort to provide quality education. Being among the Top Engineering Colleges in India, its infrastructure is world class with workshops, state-of-the-art Laboratories, overhead projectors in every classroom, an extensive library and hostel facilities for outdoor students.

ABOUT DEPARTMENT

Electronics aims at making the life of human beings comfortable. Communication connects people and brings them together. The vast application of electronics and the rapid advancements in the field of communications makes the study of this branch a covered option. Keeping in line with fast changing technological developments, the department has well designed, laboratories with modern equipments like Spectrum Analyzer, Logic Analyzer, DSO and advanced software's like MATLAB, Proteus, Cadence, etc.

OBJECTIVES OF WORKSHOP

Assimilating the information on Antenna Design so that the hard work of the experts is known and put into practise in cases of various applications examining the development of antenna technologies and architectures for future communications, remote sensing, and scientific applications in order to explore and expound on the requirements of new trends and opportunities.

Andhra Pradesh

Prof Suyog Vinayak Pande
Asst Professor , E & TC
SVKM's NMIMS MPSTME
Shirpur Campus

WORKSHOP CONTENTS

- Wearable Microstrip Patch Antennas,
- Practical Antenna Design Configuration on HFSS,
- Reconfigurable Antennas on HFSS
- Demonstration of PathWave Advanced Design System (ADS)
- Design Examples of MPA using ADS
- Ansys HFSS Demo
- Metamaterial Patch Antenna

Instructions for Participants

- Attendance is mandatory.
- Registration Deadline is 24th February 2023 before 5pm.
- Interested participants must register with the link in the brochure and provide all information correctly.
- Registered participants should join the sessions timely.
- Registered participants have to submit all sessions feedback in a timely manner to go for certification.
- All registered participants can join whatsapp group to get all updates related to workshop.
- In case of any difficulty, please feel free to contact coordinator.
