- 3. Event Conduction Duration:** 1 day
- 4. Event Venue:** Seminar Hall Mechanical Department
- 5. Name of Event Coordinator:** Dr. S. A. Gade
- 6. Number of Participants:** 68

### Event Report

The Lecture 2 of Impact Lecture series was conducted on the topic of “Design thinking” by Mr. Kedar Devi who is an Architect by profession. In his lecture he covered basic information related to design thinking. Mr Devi steps to be followed for finding the solutions. Defining the problem is the essential first step in finding a solution. It involves clearly identifying the issue, understanding its root causes, and setting the stage for targeted, effective problem-solving. A well-defined problem provides the necessary focus and direction to guide the problem-solving process. Third year students of all departments of SIEM along with their class teachers and faculties attended the lecture.
