

- 1. Event Title:** Celebration of Nation Pollution Control Day
- 2. Event Date:** 02/12/2023
- 3. Event Conduction Duration:** 4Hrs.
- 4. Event Venue:** Sandip Foundation Campus, Civil Engineering Department SIEM
- 5. No. of Attendies :** 100+ Students and all Teaching Non-teaching Staff of SIEM.
- 6. Program Objective & Outcome:**

We all know, National Pollution Control Day is on December 2nd each year. It reminds us about the serious problem of pollution and how we can stop it. This day aims to create awareness about the disasters caused by various types of pollution and highlight the prevention measures from industrial disasters like the “Bhopal Gas Tragedy”.

This day is important because of the Bhopal Gas Tragedy in 1984, which was really bad. We need to learn from it and make sure it doesn't happen again. National Pollution Control Day tells us we all need to take care of the earth. We should use less harmful things and follow rules to keep the air, water, and soil clean. Everyone can help by being responsible and learning how to be kind to the environment.

This event was celebrated by the civil engineering department in the presence of the department's Head of department, Dr. Bharat Mulay. As instructed by event coordinator Prof. Pritesh More, all students from the civil department cleaned the Trimbakeshwar Temple area by collecting plastic waste.
