- **Event Objective & Outcome:**

Objectives:

Students can understand the SAP is a widely used ERP application software that has been successful in the industries. It can help an organization meet their strategic business goals by helping to optimize operations, reduce costs, and increase sales. There are many advantages to hiring SAP training professionals. This software can easily improve performance, cut down on work time, and build positive relationships with clients. In addition to the centralization of data, SAP systems also offer a centralized location for users to access all necessary information. This feature not only saves time but fosters closer relationships between departments as well. As company data is consolidated into one place, it becomes easier to navigate and manage. Additionally, with SAP software in place, employees can more easily obtain needed information from any source - making their everyday lives much simpler.

Outcomes: Mr. Shrikant Bidwai (Prudentia Technology Solution's India Pvt. Ltd. delivered expert lecture for MBA students, Students understand the importance all the modules of SAP used in various industries, they also understand the various applications, roles & future scope of SAP.

- **Total Number of Participants:** 85
